

Basic Course Information

Semester	FALL 2014	Instructor Name	Rosalba Jepson RN MSN Carmen Fitzsimmons RN BSN
Course Title & #	Nursing Fundamentals	Email	rosalba.jepson@imperial.edu carmen.fitzsimmons@imperial.edu
CRN #	10788	Webpage (optional)	
Room	2139	Office	2130 Part-Timers: Room 809
Class Dates		Office Hours	12-2 PM
Class Days	M W Th F	Office Phone #	760-355-6294
Class Times		Office contact if student will be out or emergency	Dolores Hartfield
Units	6		

Course Description

This course provides an introduction to nursing and roles of the nurse, as well as profession related and patient care concepts. Emphasis is placed on the knowledge and skills needed to provide safe, quality care. The theoretical foundation for basic assessment and nursing skills is presented, and the student is given an opportunity to demonstrate these skills in a clinical laboratory setting. An introduction to the nursing process provides a decision-making framework to assist students in developing effective clinical judgment skills. Utilization of the nursing process and developmental theories (primary Erikson), focus on the nursing role as communicator, provider of care, and patient teacher. Parameters of health are defined. Nursing fundamental concepts are introduced related to physical and psychological assessment needs of the normal and ill individual; pain assessment, interventions and evaluation; basic nutrition; and stress and adaption concepts. Variations in nursing care for individuals of different socio-economic and cultural backgrounds will be explored

Course Objectives

- 1. Discuss the role of the nurse and scope of practice related to established code of ethics, nurse practice acts, and professional registrations/ certifications**
- 2. Review the spectrum of health care settings across which patient care is provided**
- 3. Recognize the importance of selected profession related concepts as they pertain in providing and directing safe, quality patient care**
- 4. Discuss the concepts integral to the provision of safe, quality patient centered care: nursing process, clinical judgment, advocacy, cultural sensitivity, communication and stress, coping and adaptation.**
- 5. Appreciate the nurse's role in identifying and supporting selected physiologic needs of patients**
- 6. Describe selected concepts and discuss how they relate to providing patient care that is safe for the nurse and patient: medication administration, documentation, body mechanics and ergonomics, and nursing process.**
- 7. Demonstrate basic nursing skills using proper techniques and measures that ensure patient safety.**
- 8. Apply the various elements of the nursing process to clinical decision-making.**

SLOs – Student Learning Outcomes

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

Imperial Valley College Course Syllabus – Course Title and number

1. Demonstrate basic fundamental nursing skills, which will be evaluated through written examinations and ATI Fundamental exam. (ILO1, ILO2)
2. Identify the ten 2013 National Patient Safety Goals (NPSGs), that will be evaluated by written exam and clinical observation. Students will apply the NPSGs in the clinical setting. (ILO2, ILO3, ILO5)
3. Develop a nursing care plan utilizing the nursing process; which will be evaluated by written exam, class presentation and application in the clinical setting (ILO1, ILO2, ILO3, ILO4)
4. Administer safe medication administration to patients of all ages in lab simulation and in the patient clinical setting. Inclusive: oral, intramuscular and subcutaneous medications, and correct patient identification in accordance to the National Patient Safety Goals and QSEN (ILO1, ILO2, ILO3, ILO4)
5. Compare and contrast physical assessments of patients of all ages with the emphasis on the physiological basis of vital signs and health conditions. (ILO1, ILO2, ILO3, ILO4)
6. Demonstrate safe nursing care for assigned patients with emphasis on patient safety and clinical safe environment. (ILO2, ILO3)

Course Requirements

- **COURSE PREREQUISITES: Admission to the Associate Degree Nursing Program**
- **COREQUISITES: NURS 109 with a minimum grade of C or better**
- **RECOMMENDED PREPARATION:**

Instructional Methods

- Audio Visual: DVD of skills required for successful course completion
- Computer Assisted Instruction: Internet research, case study
- Demonstration: skills required for successful course completion
- Discussion: Related topics on Nursing Fundamentals and skills
- Group Activity: Presentation on the Nursing Process; Presentation on Nutritional values in Foods
- Lab Activity: Assessment Skills; Nursing Fundamental Skills; Check-off demonstrations
- Lecture; powerpoint
- Simulation/Case Study: Nursing skills and Vital signs

Two (2) hours of independent work done out of class per each hour of lecture or class work, or 3 hours lab, practicum, or the equivalent per unit is expected.

Imperial Valley College Course Syllabus – Course Title and number

Out of Class Assignments: The Department of Education policy states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time and two (2) hours of out-of-class time per week over the span of a semester. WASC has adopted a similar requirement.

Out of class assignments include reading assignments from required textbooks listed for this course (see text book list); and may include writing assignments like care plans, concept-mapping, drug cards, short essays, and/or professional papers, videos, online research. Possible outside assignments may include, but not limited to, nursing lectures or inservices offered by local health facilities or healthcare providers.

Class activities: Class participation and discussion, presentations, unit exams, pop quizzes, calculation exam and Final exam.

Clinical assignments: Clinical pre-assignments will include preparations for clinical by practicing and demonstrating skills in a check-off simulation, obtaining patient data, reviewing medication information, and completing pre-assignments as designated for each clinical area. Clinical hours will be spent demonstrating proficiency, providing professional nursing care to assigned patients, observations in various clinical departments, and participating in simulation. Written post-assignments will relate to the clinical experience and may include but not be limited to care plans, case studies, documentation exercises. Clinical sites will include hospitals, clinics, and simulation lab.

Simulations: Simulation exercises provide a safe learning environment where all students have the opportunity to interact within a structured scenario. Students will be introduced to the Simulation lab with the opportunity to prepare for simulation activities in advance. All advance assignments must be completed before the start of a simulation activity. Failure to complete the pre-assignment will prevent the student from attending the class for the day and results in a clinical absence.

Requirements for attending clinical assignments: Students are responsible to complete all facility requirements, i.e., BLS training, immunizations, background checks, drug screening, specific hospital orientation, etc., prior to clinical rotations (please see the student handbook for more information). A student will not be allowed to attend any clinical hours until this is done. This will constitute an absent from clinical hours. If over the maximum hours of absenteeism because of this, the student will be dropped from the class.

Course Grading Based on Course Objectives

Students must maintain a “C” average grade as determined by the scale below. Grades will not be “rounded”. To advance to the next semester, a “C” or better is required in this course.

A = 92-100%

B = 83-91%

C = 75-82%

D = 68-74%

F = Below 68%

The course grade will be computed as follows 65% will come from an average of all assignments prior to the final exam and 35% of the course grade will come from the final exam.

All of the following must be attained to successfully pass this course:

- A. Final Theory Exam score must be passed at a 75%.
- B. Clinical grade must total an equivalent of 75% or greater based on all points accumulated.
- C. Theory (exams) grade must total equivalent of 75% or greater.
- D. Pharmacology calculation test must be passed with a 92%.
- E. Less than 3 unsatisfactories in clinical work must occur.
- G. Final clinical evaluation must show all categories as “Adequate” or “Satisfactory”
- F. THERE WILL BE NO MAKE-UPS FOR TESTS OR QUIZZES MISSED DUE TO ABSENCE.

Clinical Evaluation: Clinical evaluation is continually done to assess the that students meet “satisfactory” and “safe practice” in all areas to pass the course. Evaluation is based on adherence to nursing standards of care, QSEN competencies, written assignments, and professional performance and attendance. An unsatisfactory performance in the

clinical practice may be given for unprofessional conduct or “unsafe” practice, for not completing patient care assignments or any other clinical assignments. Students may be required to remediate before returning to the clinical setting. Three accrued unsatisfactories in clinical practice will be issued to each student for failure to meet the clinical objectives and assignments, including excessive absents. Failure to pass the clinical component of this course will result in failure of this class regardless of the overall grade.

Calculation Exam: As a measure of clinical safety, a dosage calculation exam will be given in the first week of class. The dosage calculation exam will have 25 questions in which the student must pass with a score of 92% or better in order to continue in the class. The score will not be included in the grade point average for this class; it is a pass/fail assignment. If the student is unsuccessful after the second attempt or repeat math exam, the student will not be allowed to progress to the next semester. Therefore, it is strongly recommended for students to completed the medication pharmacology prior to admittance to the nursing program.

ATI Fundamentals of Nursing Exam: ATI exam is included in the course grade. Students are responsible for reading all material in the ATI Nursing Fundamentals book prior to the assigned test date.

It is recommended that if a grade falls below 78% that the student will arrange to meet with the faculty member. Changes in the clinical schedule or any assignments may change at the discretion of the instructors, taking into account the progress of students with. Instructor must consider the daily routine and audits that take place during the operation hours of the health care facilities. Any change will be announced in class, text and/ or via email through Blackboard. Students are responsible for all materials covered in the syllabus and for any changes that are announced in class or by email. Students are responsible for withdrawing (W) from the class before the deadline as outlined on your registration forms. Failure to pass this class will affect your ability to progress to the next semester. Students failing or withdrawing must complete a Petition to Re-Enter.

Attendance

- A student who fails to attend the first meeting of a class or does not complete the first mandatory activity of an online class will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student’s status will be the same as that of any other student who desires to add a class. It is the student’s responsibility to drop or officially withdraw from the class. See General Catalog for details.
- Regular attendance in all classes and clinical activities is expected of all students. A student whose continuous, unexcused absences exceed the number of hours the class is scheduled to meet per week may be dropped. For online courses, students who fail to complete required activities for two consecutive weeks may be considered to have excessive absences and may be dropped. Absenteeism leads a student to fall behind in class and clinical activities. Class and clinical activities are not repeated in class or lecture.
- Absences attributed to the representation of the college at officially approved events (conferences, contests, and field trips) will be counted as ‘excused’ absences. Keep in mind that an excused absence is still an absent and you ‘miss out,’ however, at the discretion of the instructor, the student may be assigned make up assignments for excused absences only
- Absenteeism and/or tardiness beyond the maximum allowed will result in being dropped from NUR 107. This will result in a “W” grade if before the drop date and “F” if after that date. See handbook for the policy on absence
- Three tardies equal one absent.

Classroom Etiquette

- Electronic Devices: Cell phones and electronic devices must be turned off and put away during class, unless otherwise directed by the instructor. **Consider:** specifics for your class/program
- Food and Drink are prohibited in all classrooms. Water bottles with lids/caps are the only exception. Additional restrictions will apply in labs. Please comply as directed.
- Disruptive Students: Students who disrupt or interfere with a class may be sent out of the room and told to meet with the Campus Disciplinary Officer before returning to continue with coursework. Disciplinary procedures will be followed as outlined in the General Catalog.

Imperial Valley College Course Syllabus – Course Title and number

- Children in the classroom: Due to college rules and state laws, no one who is not enrolled in the class may attend, including children.

Clinic etiquette:

- Professionalism: you are expected to conduct yourselves in a professional manner, dress in professional uniform, uniform is clean and pressed, white shoes (no cloth tennis), name badges, hair groomed and long hair pulled up, and fingernails clean, no polish. Students may not wear long earrings or facial ‘bling’ jewelry
Students are expected to adhere to the student code of conduct
- Confidentiality: all information, verbal, written or electronic, related to facilities or patients must remain confidential.
- Hospital policy: Students are expected to adhere to hospital policy as related to students. These will be discussed at hospital orientations and during the course as appropriate to the topic. Disciplinary action may be administered if violation to regulations, which may include a written dissatisfaction warning to dismissal of the program related to the degree of violation.

Academic Honesty

- Plagiarism is taking and presenting as one’s own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to ‘cite a source’ correctly, you must ask for help.
- Cheating is defined as fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.
Anyone caught cheating or will receive a zero (0) on the exam or assignment, and the instructor will report the incident to the director of nursing and the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to the General School Catalog for more information on academic dishonesty or other misconduct. Acts of cheating include, but are not limited to, the following: (a) plagiarism; (b) copying or attempting to copy from others during an examination or on an assignment; (c) communicating test information with another person during an examination; (d) allowing others to do an assignment or portion of an assignment; (e) using a commercial term paper service.
- Falsification of records in the clinical settings is an extreme violation to the Nursing Practice Act and code of conduct. Falsifying records is a crime.

Additional Help – Discretionary Section and Language

- Blackboard support center: <http://bbcrm.edusupportcenter.com/ics/support/default.asp?deptID=8543>
- Learning Labs: There are several ‘labs’ on campus to assist you through the use of computers, tutors, or a combination. Please consult your college map for the Math Lab, Reading & Writing Lab, and Study Skills Center (library). Please speak to the instructor about labs unique to your specific program.
- Nursing Learning Lab: This lab is designated for nursing students and is provided with tutors, computers, videos, lab practice rooms, simulation manikins, and nursing library to enhance your learning experience. It is located in building 2100
- Library Services: There is more to our library than just books. You have access to tutors in the Study Skills Center, study rooms for small groups, and online access to a wealth of resources.

Disabled Student Programs and Services (DSPS)

Any student with a documented disability who may need educational accommodations should notify the instructor or the Disabled Student Programs and Services (DSP&S) office as soon as possible. The DSP&S office is located in Building 2100, telephone 760-355-6313, if you feel you need to be evaluated for educational accommodations.

Student Counseling and Health Services

Students have counseling and health services available, provided by the pre-paid Student Health Fee. We now also have a fulltime mental health counselor. For information see <http://www.imperial.edu/students/student-health-center/>. The IVC Student Health Center is located in the Health Science building in Room 2109, telephone 760-355-6310.

Students have the right to experience a positive learning environment and due process. For further information regarding student rights and responsibilities, please refer to the IVC General Catalog available online at http://www.imperial.edu/index.php?option=com_docman&task=doc_download&gid=4516&Itemid=762

Information Literacy

Imperial Valley College is dedicated to helping students skillfully discover, evaluate, and use information from all sources. Students can access tutorials at <http://www.imperial.edu/courses-and-programs/divisions/arts-and-letters/library-department/info-lit-tutorials/>

Anticipated Class Schedule / Calendar

8/18/14

CRN # 10788 NUR 107 - Nursing Fundamentals -

Instructors:

Rosalba Jepson MSN RN office: # 2130 ph# 460-355-6294 rosalba.jepson@imperial.edu
 Carmen Fitzsimmons RN ph# 760-604-1913 carmen.fitzsimmons@imperial.edu

Class starts: 8/18/14 - ends: 10/24

Drop Deadline with "W": 10/8/2014

ROOM	DATE	TIME	DESCRIPTIONS and Assignment	INSTRUCTOR
Week 1 Lecture Room 2139	Mon. 8/18/14	0800 to 1130 0900 1230	Nursing Role & Scope of Practice - read: Kozier Ch. 1,4, and ch 3, p.42 Healthcare Spectrum - read: Kozier Ch. 6 and ch 43, p.1112-3 (Palliative Care) Interdisciplinary collaboration <i>My Nursing Lab</i> : unit 1: module 1; and unit 2: module 1 Pearson: My Nursing lab registration in the NLC #1 Calculation TEST (after class at 1200)	R. Jepson
Week 1 Clin/Skills Lab 2159	Wed. 8/20/14	8000 to 1200 1230 to 1515	Clinical orientation ECRMC – meet at front lobby 0745 for glucometer training PMHD – meet at front lobby 0830, hospital tour & glucometer training @ 1000 Concepts of Health Assessment - read: Kozier Ch 29, 30; Berman Ch 2, 3 <i>My Nursing Lab</i> : unit 7: module 3 (lessons 1,2,3) Videos: Vital signs, Respiratory & Skin assessment. (Head-to-Toe Assessment) <u>Skills you will demonstrate:</u> Complete vital signs; Respiratory and Skin Assessment. Must know how to perform a head-to-toe assessment when clinical patient assignments are given.	R. Jepson C. Fitzsimmons
	Thur. 8/21/14	8000 To 1200 1515	Hospital Orientation ECRMC – meet at IS Valley Plaza, 0745 for Sorian/ MAK training PMHD – remain at IVC, resume skills day Concepts of Patient Hygiene - read: Kozier Ch.33; Berman Ch.1,5 and 6 <i>My Nursing Lab</i> : unit 8: module 4 (lesson 4) Videos: Hand hygiene, Bedbath (adult/child), Perineal care, Oral care, hair/ear/foot care Making the occupied/unoccupied bed <u>Skills you will demonstrate:</u> Hand hygiene; applying appropriate PPE, Standard Precautions, Making the Occupied bed; Patient Bedbath	R. Jepson C. Fitzsimmons
	Fri. 8/22/14	0800 to 1230	Concepts/ Activity and Exercise – read: Kozier Ch 44; Berman Ch 10, 11 <i>My Nursing Lab</i> : unit 10: module 4 (lesson 3) <u>Skills you will demonstrate:</u> Range of motion, protective positioning (supine, side-lying, Fowlers); Patient transfer bed/chair. #2 Calculation TEST - retake (after class at 1230)	R. Jepson C. Fitzsimmons

Imperial Valley College Course Syllabus – Course Title and number

ROOM	DATE	TIME	DESCRIPTIONS and Assignment	INSTRUCTOR
Week 2 Lecture Room 2139	Mon 8/25/14	0800 to 1130	The Nursing Process - Wilkinson Ch. 3,4,5,6,7,8,9 May also refer to Kozier Chps 10-15, which coincides with <i>My Nursing Lab</i> : unit 3: module 1, (lessons 4,5) Developing a Nursing Care Plans	R. Jepson
Week 2 Clin/Skills Lab 2159	Wed. 8/27/14	8000 to 1515	Concepts of Infection Control - Kozier Ch 31; Berman Ch 7, Skills you will demonstrate: PPE, sterile glove and sterile surgical gown, maintaining sterile field. <i>My Nursing Lab</i> : unit 8: module 4 (lesson 2) SKILLS EXAM #1: Health assessmt; hygiene care, ROM; occupied bed, protective positioning, VS	R. Jepson C. Fitzsimmons
Week 2 Clin/Skills (cont')	Thur. 8/28/14	8000 to 1515	Hospital Orientation PMHD – meet front lobby 0745 for Hospital orientation/computerize training Skills Demonstration: Resp./Skin assessment; Bedbath; making occupied bed, patient positioning & ROM	R. Jepson C. Fitzsimmons
	Fri. 8/29/14	0800 to 1230 1300	Concepts of Infection Control - Kozier Ch 36; Berman Ch 31, Skills you will demonstrate: Wound care (cleansing and irrigation); suture/staple removal, application of sling and ace wrap (circular, recurrent, spiral and spiral reverse). <i>My Nursing Lab</i> : unit 8: module 4 (lesson 6) #3 Calculation TEST – retake MUST PASS CALCULATION EXAM IN ORDER TO CONTINUE THE COURSE	R. Jepson C. Fitzsimmons R. Jepson
Week 3	Mon 9/1/14		HOLIDAY - CLASSES CLOSED	
Week 3 Clin/Skills Lab 2159	Wed. 9/3/14	0645 to 1500	Clinical site Post conference: Profession related concepts of informatics Kozier Ch 9	R. Jepson C. Fitzsimmons
	Thur. 9/4/14	0645 to 1500	Clinical site	R. Jepson C. Fitzsimmons
	Fri. 9/5/14	8000 to 1230	SKILLS EXAM #2 – Wound care Skills Demonstration: Wound care (cleansing & irrigation); suture/staple removal, application of sling/ace wrap (circular, recurrent, spiral, spiral reverse).	R. Jepson C. Fitzsimmons
Week 4 Lecture Room 2139	Mon 9/8/14	0800 to 1130	Concepts of Safety: Hazards of immobility Kozier Ch 32 <i>My Nursing Lab</i> : unit 8: module 4 (lesson 1) NPSG: Fall prevention	R. Jepson
Week 4 Clin/Skills Lab 2159	Wed. 9/10/14	0645 to 1500	Clinical site Post conference: Patient transfer modalities	R. Jepson C. Fitzsimmons
	Thur. 9/11/14	0645 to 1500	Clinical site	R. Jepson C. Fitzsimmons

Week 8 Clin/Skills Lab 2159	Wed. 10/8/14	0645 to 1500	Clinical site practice: enema, bedpan, urinal, specimen collection	R. Jepson C. Fitzsimmons
	Thur. 10/9/14	0645 to 1500	Clinical site practice: enema, bedpan, urinal, specimen collection	R. Jepson C. Fitzsimmons
	Fri. 10/10/14	8000 to 1230	SKILLS EXAM #5 – urinary catheterization Skills test #: Foley catheterization: insertion, removal, sterile urine collection	R. Jepson C. Fitzsimmons
Week 9 Lecture Room 2139	Mon 10/13/14	0800 to 1130	Concepts of Cultural care & Spirituality - Koziar Ch 18, 19, 41 <i>My Nursing Lab:</i> unit 4: module 2 (lesson 2) <i>My Nursing Lab:</i> unit 9: module 2 (lesson 2) Cultural Diversity in Health & Illness Ch 1-3 Group assignment: Health & illness on a cultural population – due: 10/22/14 ATI Exam (1st)	R. Jepson
Week 9 Clin/Skills (Cont')	Wed. 10/15/14	0645 to 1500	Clinical site	R. Jepson C. Fitzsimmons
	Thur. 10/16/14	0645 to 1500	Clinical site	R. Jepson C. Fitzsimmons
	Fri. 10/17/14	8000 to 1230	Concepts of Oxygenation Koziar CH 50 Diagnostic Testing Koziar Ch 34 <i>My Nursing Lab:</i> unit 10: module 4 (lesson 10) <i>My Nursing Lab:</i> unit 8: module 4 (lesson 5)	R. Jepson C. Fitzsimmons
Week 10 Lecture Room 2139	Mon 10/20/14	0800 to 1130	Concepts of Patient Centered Care and health promotion Koziar Ch 16,17, 19, 24, 25 Concepts of Nursing Professionalism and Leadership Koziar Ch 5, 28	R. Jepson
Week 10 Clin/Skills Lab 2159	Wed. 10/22/14	0645 to 1500	Clinical site ATI Exam (2nd) meet at IVC NLC @ 1400	R. Jepson C. Fitzsimmons
	Thur. 10/23/14	0800 to 1530	Simulation: Skills Validation. Meet at IVC NLC	R. Jepson C. Fitzsimmons
	Fri. 10/24/14	8000 to 1230	FINAL EXAM	R. Jepson C. Fitzsimmons

This syllabus is subject to minor changes.

QSEN – Quality and Safety Education for Nurses. QSEN competencies are integrated into the course curriculum to build upon the fundamental concepts introduced in prior courses with the focus on health issues across the lifespan. Clinical opportunities are designed to facilitate application of QSEN competencies in knowledge, skills, and attitude focusing on lifespan health issues through care of diverse populations in a variety of settings.

UNIT CONTENT

Unit 1: Nursing Role and Scope of Practice

1. Define nursing and relate its current state to historical events and nursing leaders.
2. Compare and contrast the various roles of contemporary nurses today.
3. Review the different educational paths to professional nursing and their implications for career mobility and advancement.
4. Discuss the scope of practice of unlicensed personnel, licensed/vocational nurses, professional nurses, and advanced practice nurses.
5. Describe how state nurse practice acts define the legal scope of nursing practice to protect patient's rights and reduce risk of nursing liability.
6. Review an established code of ethics and its role in guiding nursing practice and ethical decision making.
7. Recognize competencies related to knowledge, skills, and attitudes that nurses are expected to integrate into their practice.

Unit 2: Spectrum of Healthcare

1. Differentiate between the terms health and illness and the impact that lifestyle and risk factors has on one's health status.
2. Define the terms health promotion and wellness and discuss the nursing role in promoting the patient's health and wellness and disease prevention
3. Differentiate between primary, secondary, and tertiary care as well as the role of the nurse when providing these levels of care.
4. Differentiate between the goals of acute and chronic care and examples of patient conditions in each category.
5. Discuss the principles of restorative or rehabilitative care, its goals, and the role of the nurse when working
6. with patients undergoing rehabilitation.
7. Compare and contrast palliative and hospice care and the role of the nurse in providing end of life care.
8. Describe the various health care settings in which health care is delivered to patients of all ages.
9. Discuss the roles of state and federal governments in regulating health care agencies.

Unit 3: Profession Related Concepts/ Patient Centered Care

1. Discuss the meaning of patient-centered care
2. Describe concepts of holistic health and nursing.
3. Describe the concept of caring as a foundation for nursing practice
4. Review the professional skills inherent in providing patient-centered care.

CONTENT TOPIC

The Nursing Process:

- a. Define the nursing process and discuss its use as a tool for identifying actual and potential patient problems and planning patient-centered care.
- b. Compare and contrast the various steps of the nursing process and the role of the nurse
- c. Discuss the purpose of a patient plan of care, its developmental process, its implementation, and role in determining attainment of patient outcomes.

Clinical Judgment:

- a. Define clinical judgment and its relationship to nursing practice
- b. Compare and contrast clinical judgment and critical thinking.
- c. Differentiate between decision making and problem solving.
- d. Discuss the significance of the scientific method for determining best nursing practices.

Advocacy:

- a. Define advocacy and its relationship to nursing practice.
- b. Discuss the relationship between the nurse's role as advocate and the patient's right to information and

- make informed health care decisions.
- c. Review the Patient's Bill of Rights and the Self Determination Act and their association with the nurse's role as patient advocate.

Cultural Sensitivity:

- a. Define cultural sensitivity and its relationship to nursing practice.
- b. Discuss the term culture and the various components that contribute to its definition (ethnicity, spiritual beliefs, social practices).
- c. Compare and contrast the terms cultural sensitivity and cultural competence in relation to the role of the health care provider.
- d. Recognize the influence culture has on health, health practices, illness, and caring patterns.

Communication:

- a. Define communication and its relationship to nursing practice.
- b. Describe the four components of the communication process.
- c. Differentiate between verbal and nonverbal communication.
- d. Discuss characteristics of varied types of communication.
- e. Differentiate between non-therapeutic and therapeutic communication.
- f. Discuss the use of technology in the communication process.
- g. Describe how nursing documentation is a written form of communication.
- h. Identify potential barriers to effective communication.

Unit 4: Profession Related Concepts/ Interdisciplinary Collaboration

1. Define the concept of interdisciplinary care.
2. Describe the essential aspects of collaborative health care.
3. Discuss the benefits of an interdisciplinary health care team providing client care.

Unit 5: Profession Related Concepts/ Evidence-Based Practice

1. Define the concept of evidence-based practice
2. Identify available resources for evidence-based nursing practice.
3. Discuss how evidence-based practice provides optimum care for individuals and their families.

Unit 6: Profession Related Concepts/ Quality Improvement

1. Define the concept of quality improvement.
2. Discuss the role of the nurse in identifying patient concerns related to quality care.

Unit 7: Profession Related Concepts/ Safety

1. Define the concept of patient safety
2. Discuss personal and environmental factors that impair a patient's ability to protect themselves from injury.
3. Review interventions that can assist in reducing risk of patient injury (properly identifying patient, using six rights of medication administration, performing fall risk assessment, communicating patient information to appropriate team member).
4. Discuss how proper and effective use of technology and standardized policies and procedures support safe, quality care.
5. Recognize the role of the nurse in monitoring own care and that of others in promoting a safe environment for the patient.
6. Review the National Patient Safety Goals developed by the Joint Commission and their relationship to the development of national safety standards and accreditation of health care institutions.

Unit 8: Profession Related Concepts/ Informatics

1. Define the concept of informatics
2. Describe the uses of computers in nursing education and practice.
3. Discuss the computer skills and computer applications necessary for monitoring and documenting patient information.
4. Observe use of appropriate search engines and databases to obtain evidence based research when determining best practice.

Unit 9: Profession Related Concepts/ Patient Education

1. Define the concept of patient education.
2. Identify the role of the nurse in relation to patient education.
3. Describe the three domains of learning.
4. Review basic principles of learning.
5. Discuss how to identify educational needs of patients.
6. Describe the various elements of a teaching plan for patients.

Unit 10: Profession Related Concepts/ Professionalism

1. Define the concept of professionalism and its relationship to nursing practice.
2. List professional behaviors that are consistent with those of a nurse.
3. Discuss the relationship of ethical and legal practice to the role of nurses.
4. Compare and contrast accountability and responsibility.

Unit 11: Profession Related Concepts/ Leadership

1. Define the concept of leadership
2. Identify the characteristics of effective leaders.
3. Describe various leadership roles assumed by nurses.
4. Discuss how nurses as leaders can influence provision of safe patient care.

Unit 12: Client Related Concepts/ Rest and Sleep

1. Review the role played by rest and sleep in maintaining good physical and mental health.
2. Discuss the effect that lack of sleep has on a patient's physical and mental health.
3. Discuss developmental variations in sleep patterns.
4. Describe the functions, physiology, and stages of sleep.
5. Identify conditions that interfere with a patient's rest and sleep pattern.
6. Recognize the characteristics of common sleep disorders.
7. Review nursing interventions that can help improve a client's quality of rest and sleep.

Unit 13: Client Related Concepts/ Spirituality

1. Compare and contrast the concepts of spirituality and religion.
2. Review the religious practices of selected religions and their relationship to health promotion and health care.
3. Determine factors that contribute to spiritual distress and resulting manifestations.
4. Review the nurses' role when caring for patients who are experiencing spiritual distress.

Unit 14: Patient Related Concepts/ Growth and Development

1. Review selected theories of human development and their respective stages.
2. Discuss the impact that successful and unsuccessful achievement of developmental tasks has on the ability of an individual's to progress to a higher level of development.
3. Ascertain the personal and environmental factors that can influence in individual's success achievement of developmental tasks.
4. Review indicators of successful and delayed task resolution.

Unit 15: Patient Related Concepts/ Sensory Perception

1. Review the role played by sensory perception in maintaining good physical health.
2. Describe the anatomical and physiological components of the sensory-perceptual process.
3. Discuss factors that affect a patient's sensory perceptual processes.
4. Identify conditions that interfere with patients' ability to process sensory input.
5. Differentiate between sensory deficits, overload, and deprivation.
6. Review nursing interventions that can facilitate or maintain a patient's sensory perceptual processes.

Unit 16: Patient Related Concepts/ Hygiene (includes Hygiene Skills Lab)

1. Review the role played by the skin, mucous membranes, teeth, and nails in maintaining the body's first line of defense against pathogens.
2. Describe conditions and activities that place patients at risk for altered skin integrity.
3. Discuss hygienic practices that support healthy skin integrity.
4. Discuss the effect that cultural practices and developmental stage has on hygiene practices.
5. Determine a patient's need for assistance with hygiene-related care.
6. Describe the procedures for providing hygiene-related care in a safe, comfortable environment.
7. Demonstrate proper techniques that support patient hygiene.

CONTENT TOPIC

- a. Hygiene skills lab/ mouth, skin, hair, nail, foot and perineal care
- b. Hygiene skills lab/ baths and bed making

Unit 17: Patient Related Concepts/ Activity and Exercise (includes Mobility Skills Lab)

1. Review the role played by the musculoskeletal and neurological systems in providing and regulating movement.
2. Relate the effect exercise has on proper functioning of body systems and activity tolerance.
3. Identify the elements of an exercise program that serves to maintain proper functioning and prevent lifestyle diseases.
4. Discuss the effect lack of movement has on bones, muscles, and joints.
5. Discuss the effect developmental stage has on bone, muscles, and joints.
6. Demonstrate proper techniques that support patient mobility and prevent complications of immobility.

CONTENT TOPIC

Mobility skills lab:

- a. walking with a crutch/cane/walker
- b. wheelchair assembly/disassembly and use
- c. patient positioning
- d. pressure ulcer prevention measures and equipment
- e. Mobility skills lab/ range of motion

Unit 18: Patient Related Concepts/ Infection Control (includes Infection Control Skills Lab)

1. Compare and contrast the various elements of the chain of infection.
2. Review the anatomical and physiological barriers that protect an individual against infections.
3. Describe the signs and symptoms of an inflammatory response, local and systemic infections, and related diagnostic tests.
4. Discuss the etiology of nosocomial infections
5. Differentiate between medical and surgical asepsis.
6. Relate principles of asepsis and their application to patient care and wound care.
7. Differentiate between standard precautions and various types of isolation precautions.
8. Review nursing interventions that can protect a patient against infections.
9. Demonstrate proper techniques that support infection control in patient care and wound care.

CONTENT TOPIC

Infection control skills Lab:

- a. hand hygiene and universal precautions
- b. isolation precautions and application of personal protective equipment (PPE)
- c. medical and surgical asepsis, surgical scrub, applying sterile gloves and surgical gowning
- d. wound care

Wound care includes:

- a. wound cleansing and irrigation
- b. suture and staple removal
- c. wraps and slings
- d. cold/heat application

Unit 19: Patient Related Concepts/ Elimination (includes Urinary and Bowel Elimination Skills Lab)

1. Review Bowel elimination skills: the role played by elimination in maintaining good physical health.
2. Describe the process of urine and feces production and subsequent elimination patterns.
3. Differentiate between normal and abnormal elimination patterns.
4. Discuss developmental and other factors that affect a patient's elimination status.
5. Identify conditions that interfere with patients normal elimination patterns.
6. Compare and contrast normal and abnormal characteristics of urine and feces.
7. Identify diagnostic tests related to elimination and the nurse's role in obtaining specimens.
8. Review nursing interventions that can facilitate or maintain a patient's elimination patterns.
9. Demonstrate proper techniques that support a patient's elimination needs.

CONTENT TOPIC

Bowel elimination skills Lab:

- a. bedpans and urinals
- b. collecting urine and stool specimens and documentation
- c. catheter insertion and removal, specimen collection
- d. enemas, specimen collection (hemocult)

Unit 20: Patient Related Concepts/ Nutrition (includes Nutrition Skills Lab)

1. Review the role played by nutrition in maintaining good physical health throughout the life-span.
2. Describe normal processes related to digestion, absorption, and metabolism of carbohydrates, proteins, and fats.
3. Describe the role water, vitamins, minerals, and electrolytes play in supporting body functions and processes.
4. Determine the significance of the balance between caloric intake and energy expenditure in relation to weight gain and loss.
5. Discuss physical, psychological, developmental, cultural and religious factors that affect a patient's nutritional status.
6. Identify norms for body weight and BMI based on established standards.
7. Use guidelines based on the USDA Food Pyramid when determining dietary recommendations for patients.
8. Differentiate between various alternative and therapeutic diets.
9. Review nursing interventions that can assist patients in meeting their nutritional needs.
10. Demonstrate proper techniques that support a patient's nutrition needs

CONTENT TOPIC

Nutrition skills lab:

- a. tray setup and feeding, (NG tube and feeding tube insertion, Dobhoff tube, feeding by gravity and pump, care and maintenance of G-tube)
- b. special diets
- c. intake and output

Unit 21: Patient Related Concepts/ Comfort/Pain (includes Comfort Skills Lab)

1. Review the role played by pain, as a symptom of a health issue, and its impact on basic physiological needs.
2. Review theories related to the physiology of pain.
3. Discuss physical, psychological, developmental, and cultural factors that affect the perception and expression of pain.
4. Differentiate between the various types and characteristics of pain.
5. Determine a patient's need for pain relief using established subjective tools and objective data.
6. Review pharmacologic and non-pharmacologic nursing interventions that can assist patient's in managing their pain.
7. Review alternative and complementary methods of pain relief that patient's may consider (acupressure, acupuncture, biofeedback).
8. Demonstrate proper techniques that support a patient's comfort needs.

CONTENT TOPIC

Skills Lab:

- a. application of heat and cold
- b. pain rating scales

Unit 22: Patient Related Concepts/ Medication Administration (includes Medication Skills Lab)

1. Discuss the role of the nurse in safely and legally administering medications to patients.
2. Discuss factors that can increase the risk of making a medication error.
3. Identify the six rights of medication administration.
4. Determine the various routes by which medication can be administered.
5. Perform basic apothecary to metric conversions and drug calculations.
6. Discuss the role of the nurse related to educating patients about their medications.
7. Demonstrate proper techniques that support safe medication administration

CONTENT TOPIC

Medication administration skills lab:

- a. oral by nasal, ear, eye, rectal, topical, inhaled and vaginal medications, sublingual, injections: subcutaneous, dermal and intramuscular, and gastric tube
- b. proper medication preparation using six rights
- c. basic drug calculation
- d. medication administration charting

Unit 23: Patient Related Concepts/ Documentation (includes Documentation Skills Lab)

1. Describe the significance of nursing documentation as a written form of communication.
2. Discuss the use of technology in the communication process.
3. Identify the purpose and various elements of the patient record.
4. Review the legal parameters that guide documentation and the maintenance of patient records.
5. Review proper guidelines for effective documentation.
6. Apply principles of effective documentation to an actual or simulated patient record.
7. Demonstrate proper documentation techniques that support accurate, thorough, and timely charting.

CONTENT TOPIC

Documentation skills lab:

- a. subjective and objective data
- b. narrative charting
- c. flow sheets and trending records
- d. computer information systems and computerized records

Unit 24: Patient Related Concepts/ Body Mechanics and Ergonomics (includes Body Mechanics Skills Lab)

1. Review principles of good body mechanics and ergonomics when positioning, moving, lifting, and ambulating patients.
2. Identify assistive devices that can be used when moving patients to aid in the prevention of injury.
3. Examine the relationship between using good body mechanics and preventing injuries.
4. Discuss appropriate interventions to take to minimize injury to patient and self during a patient fall.
5. Demonstrate proper body mechanics and ergonomics when positioning, moving, lifting and ambulating patients.

CONTENT TOPIC

Body mechanics skills lab:

- a. turning patient, moving patient up in bed, and use of draw sheet
- b. gait belts
- c. patient transfers

Unit 25: Patient Related Concepts/ Nursing Process (includes Nursing Process Lab)

1. Identify the steps of the nursing process.
2. Review the use of the nursing process as a tool for planning patient care.
3. Differentiate between subjective and objective data and various data collection methods.
4. Review the NANDA list of nursing diagnoses and their use in describing potential and actual patient problems.
5. Apply principles of the nursing process to an actual or simulated patient record.

CLINICAL OBJECTIVES

1. Utilize the nursing process as a framework for planning nursing care:
 - A. Practice assessment skills using proper techniques and safety measures.
 - B. Practice basic nursing skills using proper techniques and safety measures.
 - C. Use the steps of the nursing process when developing a plan of care
 - D. Include cultural and age-appropriate interventions in the plan of care.
2. Use scientific principles and evidence-based literature when planning care:
 - A. Use appropriate resources when selecting interventions for the plan of care
 - B. Base rationales for interventions on scientific principles.
3. Recognize the professional and legal responsibilities of nursing practice:
 - A. Identify skills that are within the RN's scope of practice.
 - B. Identify legal parameters that govern nursing practice.
