

Imperial Valley College Course Syllabus
Elementary Statistics - Math 119

Basic Course Information

Semester	Winter 2017	Instructor Name	Allyn Leon
Course Title & #	Elementary Statistics, Math 119	Email	allyn.leon@imperial.edu
CRN #	15052	Webpage	http://imperial.instructure.com
Room	2723	Office	2760.2
Class Dates	01/03/2017 - 02/03/2017	Office Hours	N/A
Class Days	Monday through Friday	Office Phone #	760-355-6523
Class Times	5:30 pm to 8:20 pm	MIDTERM	Friday 01/20/2017
Units	4	FINAL	Friday 02/03/2017

Course Description

Graphical representation of statistical data, calculations, and uses of various averages, measures of variability, introduction to probability, probability distributions, confidence intervals, sample size determination and hypothesis testing, ANOVA, linear regression and Chi-square analysis. Students will learn to use technology to find confidence intervals, test statistics, regression lines, and to produce graphics. This course also provides supervised practice in the appropriate use of technology designed to assist students in calculations required in beginning statistics. (CSU, UC)

Student Learning Outcomes

By the end of this course, given a problem or a set of problems, the student will demonstrate problem solving strategies by identifying an appropriate method to solve a problem, correctly set up the problem, perform the appropriate analysis and computation, and share their interpretation of the conclusion or the outcome, using correct grammar or in an oral presentation.

Course Objectives

Through various activities and assessments:

1. The student will distinguish the various ways of organizing, displaying, and measuring data.
2. The student will derive the numerical relationship that exists between bivariate data sets.
3. The student will demonstrate an understanding of the theory of probability and proficiency in solving problems of this nature.
4. The student will compute and interpret expected values and variance, and learn about the binomial distribution for discrete random variables.
5. The student will compute and interpret expected values and variance, and learn about the normal distribution for continuous random variables.
6. The student will examine the joint probability structure of two or more random variables and understand the limiting behavior of the sum of independent random variables as the number of the sample becomes larger.
7. The student will use the various types of distributions that are derived from the normal distribution.
8. The student will calculate and interpret confidence intervals for a population mean to show how probability connects to this type of statistical inference.
9. The student will use hypothesis testing as a formal means of distinguishing between probability distributions on the basis of random variables generated from one of the distributions.
10. The student will compare the means of the data from experiments involving more than two samples, including the single factor analysis of variance (ANOVA).
11. The student will fit a straight line to the given data in graphical form.
12. The student will make use of Chi-square distributions to analyze counts.

Textbooks & Other Resources or Links

1. Textbook: Introductory Statistics by Illowsky and Dean, OpenStax Publisher.

a. Online: You can view the book online at this url

http://cnx.org/contents/MBiUQmmY@18.11:2T34_25K@11/Introduction

b. Download PDF: The book will also be available as a PDF download (in Canvas).

2. Calculator: A basic calculator, like a TI-30 (costs around \$10) is recommended, or you can go with a graphing calculator, like the TI-83 or TI-84; it really depends on what other math or science classes you plan on taking later on. You **NEED** a calculator of some sort to do the work on the tests. You will **NOT** be allowed to use Cell Phone calculators on the Midterm or the Final.

Important Dates

Last day to add the class: **Thursday 01/05/2017**

Last day to withdraw from the class with a "W": **Thursday 01/26/2017**

Midterm: **Friday 01/20/2017**

Final: **Friday 02/03/2017**

Course Requirements and Instructional Methods

Practice: There will be **exercises** assigned from every section that we cover **FOR PRACTICE ONLY**. You will not turn these in. These practice exercises can be completed out of the textbook.

Online Quizzes: There will be 11 quizzes to be completed in Canvas. These quizzes will have between 10 and 30 questions and will usually cover one chapter, although some of the later quizzes may cover more than one chapter. The quizzes will have specific due dates; make sure you finish the quizzes on time! The top 10 quizzes will count towards your overall grade.

Technology Activities: There will be 3 assignments involving the use of technology (special software for computing statistics, such as Minitab or Excel). Think of these like mini projects. More information will be provided through Canvas.

Tests: Test 1 and Test 3 will take place at the end of short clusters of topics. Test 2 is the Midterm and Test 4 is the Final. All tests will take place according to the schedule below (also see IMPORTANT DATES). Tests will have between 10 and 20 questions, part multiple choice and part free response. You will be allowed to bring one sheet of notes, **HANDWRITTEN**, on both sides, and you should definitely bring a calculator. **There will be NO make-up exams.**

Missed Exams: If you miss **ANY** exam (online or on-campus), it will be recorded as a zero, and **the final exam percentage** will be used to replace that score at the end of the semester. If you miss the final, it will be recorded as a zero.

Out of Class Assignments: The Department of Education policy states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time and two (2) hours of out-of-class time per week over the span of a semester. WASC has adopted a similar requirement.

Course Grading Based on Course Objectives

Your grade will be calculated based on the following items:

10 Quizzes at 20 points each (take 11, count top 10)	200 points	~20%
3 Technology Activities @ 50 points each	150 points	~15%
Test 1 and Test 3 @ 100 points each	200 points	~20%
Test 2 (Midterm) @ 200 points	200 points	~20%
Test 4 (Final) @ 250 points	250 points	~25%
<i>Total</i>	<i>1000 points</i>	<i>100%</i>

Your final grade will be based on the following points and percentages:

90% to 100%	900-1000 points	A
80% to 89%	800-899 points	B
70% to 79%	700-799 points	C
60% to 69%	600-699 points	D
Below 60%	Below 600 points	F

The **Canvas Gradebook** is where you want to go to check your grades and progress. You can do this at any time to get an idea of how you are doing in the class.

Attendance

- A student who fails to attend the first meeting of a class or does not complete the first mandatory activity of an online class will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student's status will be the same as that of any other student who desires to add a class. It is the student's responsibility to drop or officially withdraw from the class. See General Catalog for details.
- Regular attendance in all classes is expected of all students. A student whose continuous, unexcused absences exceed the number of hours the class is scheduled to meet per week may be dropped. For online courses, students who fail to complete required activities for two consecutive weeks may be considered to have excessive absences and may be dropped. It's even more extreme in the winter or summer.
- Absences attributed to the representation of the college at officially approved events (conferences, contests, and field trips) will be counted as 'excused' absences.

Classroom Etiquette

- Food and Drink are prohibited in all classrooms. Water bottles with lids/caps are the only exception. Additional restrictions will apply in labs. Water only, please (for Midterm and Final).
- Disruptive Students: Students who disrupt or interfere with a class may be sent out of the room and told to meet with the Campus Disciplinary Officer before returning to continue with coursework. Disciplinary procedures will be followed as outlined in the General Catalog. Disruptions in an online class include being rude and inappropriate in a discussion board, chat, or email.
- Children in the classroom: Due to college rules and state laws, only students enrolled in the class may attend.

Academic Honesty

- Plagiarism is to take and present as one's own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to correctly 'cite a source', you must ask for help.
- Cheating is defined as fraud, deceit, or dishonesty in an academic assignment or using or attempting to use materials, or assisting others in using materials, or assisting others in using materials, which are prohibited or inappropriate in the context of the academic assignment in question.
- Anyone caught cheating or will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to the General School Catalog for more information on academic dishonesty or other misconduct. Acts of cheating include, but are not limited to the following: (a) plagiarism; (b) copying or attempting to copy from others during an examination or on an assignment; (c) communicating test information with another person during an examination; (d) allowing others to do an assignment or portion of an assignment, (e) use of a commercial term paper service.

Additional Help

- Learning Labs: There are several 'labs' on campus to assist you through the use of computers, tutors, or a combination. Please consult your college map for the Math Lab, Reading & Writing Lab, and Learning Services (library). Please speak to the instructor about labs unique to your specific program
- Library Services: There is more to our library than just books. You have access to tutors in the learning center, study rooms for small groups, and online access to a wealth of resources.

Disabled Student Programs and Services (DSPS)

Any student with a documented disability who may need educational accommodations should notify the instructor or the Disabled Student Programs and Services (DSP&S) office as soon as possible. The DSP&S office is located in Building 2100, telephone 760-355-6313 if you feel you need to be evaluated for educational accommodations.

Student Counseling and Health Services

Students have counseling and health services available, provided by the pre-paid Student Health Fee. We now also have a full time mental health counselor. For information see <http://www.imperial.edu/students/student-health-center/>. The IVC Student Health Center is located in the Health Science building in Room 2109, telephone 760-355-6310.

Student Rights and Responsibilities

Students have the right to experience a positive learning environment and due process. For further information regarding student rights and responsibilities please refer to the IVC General Catalog available online at http://www.imperial.edu/index.php?option=com_docman&task=doc_download&gid=4516&Itemid=762

Information Literacy

Imperial Valley College is dedicated to help students skillfully discover, evaluate, and use information from all sources. Students can access tutorials at <http://www.imperial.edu/courses-and-programs/divisions/arts-and-letters/library-department/info-lit-tutorials/>

Tips for Success

1. **Read the syllabus.** This is your primary source for information about the class. Most of your questions about points, tests, dates, locations, and procedures will be in this document. Read it!
2. **Pace yourself, and keep up.** Take a look at the anticipated class schedule of topics, readings, assignments, and tests above. This is a guide to help you keep pace with course materials. Come to class, take notes, and complete the quizzes and other assignments.
3. **Watch the videos** that are available for each cluster of topics that is supposed to be covered. I will have some supplementary videos in Canvas for you to watch.
4. **Practice.** Start the homework as early as possible during the week. Reading ahead and trying the problems before class will increase your exposure to the material.
5. **Form a study group.** Having a group of people that you discuss and work out problems with is a great way to learn.
6. **Ask questions.** Part of learning anything, including math, is not understanding, and asking questions so that the material makes sense. If something in class does not make sense, ask.

Imperial Valley College Course Syllabus

Anticipated Class Schedule / Calendar

Week #	Dates	Readings & Assignments	Tests, Quizzes, Tech Activities
1	01/02	No Class	No Class
	01/03	Introduction to the class	
	01/04	Sections 1.1, 1.2, 1.3, & 1.4	
	01/05	Sections 1.5, 2.1, 2.2	
	01/06	Sections 2.3, 2.4, & 2.5	
2	01/09	Sections 2.6, 2.7, & 2.8	
	01/10	Review and Test 1	Test 1 (Chapters 1-2)
	01/11	Section 3.1	Tech Activity 1
	01/12	Sections 3.2, 3.3, & 3.4	
	01/13	Sections 3.5, Counting Techniques, & 4.1	
3	01/16	No Class	No Class
	01/17	Section 4.2	Tech Activity 2
	01/18	Sections 4.3, 5.1, & 5.2	
	01/19	Sections 6.1, 6.2, & 7.1	
	01/20	Review and Test 2/Midterm	Test 2/Midterm (Chapters 1-7)
4	01/23	Sections 8.1, 8.2, & 8.3	
	01/24	Sections 9.1, 9.3, & 9.4	
	01/25	Sections 9.5, & 9.6	
	01/26	Sections 10.1 & 10.3	
	01/27	Section 10.4	Tech Activity 3
5	01/30	Review and Test 3	Test 3 (Chapters 8-10)
	01/31	Sections 12.1, 12.2, & 12.3	
	02/01	Sections 12.4, 12.5, & 13.1	
	02/02	Review for Final	
	02/03	Test 4/Final Exam	Test 4/Final (Chapters 1-13)
