Course Requirements and Instructional Methods

Demonstration, discussion, problem solving exercises, still life and life drawing, one and two point perspective drawing, non-architectural means to create the illusion of depth of space on a 2D surface. Written assignments, audio-visual assisted instruction, will be methods of instruction in this course. Out of class assignments will include keeping a daily sketchbook journal, with notes and sketches. The grading of these will be done on a weekly basis. This daily sketching and planning of future projects, will be highly advantageous to your growth as an artist. By doing at least 5 sketches per week, you could easily have 200-300 gesture, contour, and other kinds of sketches accumulated by the end of the semester. Although this may seem daunting at first, once you get used to taking your sketchbook with you, you will find completing this number of sketches is easy. Learn to take advantage of time between classes, waiting at the dentist's office, etc. can all become times filled with drawing experiences. The actual time spent in class per week is 6 hours, 20 minutes. The Department of Education policy states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time, and two (2) hours of out-of-class time, per week, over the span of a semester. WASC has adopted a similar requirement.
