

Basic Course Information

Semester:	Summer 2023	Instructor Name:	Pat Barbee
Course Title & #:	Diesel Preventative Maintenance & Inspection AUT 165	Email:	pat.barbee@imperial.edu
CRN #:	30230	Webpage (optional):	
Classroom:	1101	Office #:	
Class Dates:	June 20-July 27th	Office Hours:	Tuesdays 11:00am-12:00pm
Class Days:	Monday-Thursday	Office Phone #:	
Class Times:	12:30-5:10 PM	Emergency Contact:	Tisha Nelson: 760-355-6361
Units:	4.0	Class Format:	Face to Face

Course Description & Important Dates

The Diesel Preventive Maintenance and Inspection course trains students in: theory, design, operation, troubleshooting and maintenance of heavy duty truck and farm equipment. Upon successful completion of this course, the students are prepared to take the Automotive Service Excellence (ASE) Certification Exam in Preventive Maintenance T8.

(Nontransferable, AA/AS degree only)

Important Dates:

Thursday, June 22: Late registration for full-term classes ends.

Tuesday, June 27: Last day to verify your **Census Roster online**.

Tuesday, June 27: Last day for **Virtual Late Add Forms*** to be accepted.

Thursday, July 19: Deadline to drop full-term classes.

Course Prerequisite(s) and/or Corequisite(s)

None

Student Learning Outcomes

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

1. Explain how to set up a diesel preventive maintenance inspection program.
2. Explain how to set up a daily walk around inspection for diesel units.
3. Describe the proper steps for preparing the diesel equipment for short and long term stationary storage.
4. Describe the use of troubleshooting charts and service information to pinpoint the source of system problems

Course Objectives

Upon satisfactory completion of the course, students will be able to:

1. A. Inspect and repair engine systems.
2. B. Inspect and repair cab and hood instruments.
3. C. Check and repair electrical and electronic systems.
4. D. Inspect and repair frame and chassis components.
5. E. Check machine operation and road test.

Textbooks & Other Resources or Links

Textbook Used: Diesel Engine Technology 9th Edition (ISBN 978-1-64564-685-3)

Access to computer, Internet, and word type applications.

Pen and pencils

Standard writing paper and notebook.

Lab days will require: Safety glasses, work footwear (no open toe shoes, slip resistant), proper shirts and pants.

Course Requirements and Instructional Methods

This course will consist of a variety of instructional methods and assignments including, but not limited to, lectures, class discussions, group activities, interviews, and hands-on shop experiences.

Course Grading Based on Course Objectives

Grading System:

A – 513-570 of points = Excellent

B – 456-512 of points = Good

C – 399-455 of points = Acceptable

D – 342-398 of points = Below Average

F – 341 points and below = Failing

***There are no make-up exams unless arrangements with the instructor are made prior to exam.

Activities	Points
Homework, Quizzes, Class Activities, Labs	490
Final Exam	80
Total Points	570

Course Policies

- **Electronic Devices:** Cell phones and electronic devices must be turned off and put away during class, unless otherwise directed by the instructor.
- **Food and Drink:** Food and drink are prohibited in all classrooms. Water bottles with lids/caps are the only exception. Additional restrictions will apply in labs. Please comply as directed by the instructor.
- **Disruptive Students:** Students who disrupt or interfere with a class may be sent out of the room and told to meet with the Campus Disciplinary Officer before returning to continue with coursework. Disciplinary procedures will be followed as outlined in the General Catalog.
- **Children in the classroom:** Due to college rules and state laws, only students enrolled in the class may attend; children are not allowed.

Academic honesty in the advancement of knowledge requires that all students and instructors respect the integrity of one another's work and recognize the important of acknowledging and safeguarding intellectual property. There are many different forms of academic dishonesty. The following kinds of honesty violations and their definitions are not meant to be exhaustive. Rather, they are intended to serve as examples of unacceptable academic conduct.

Plagiarism is taking and presenting as one's own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to cite a source correctly, you must ask for help.

Cheating is defined as fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question. Anyone caught cheating or plagiarizing will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to the [General Catalog](#) for more information on academic dishonesty or other misconduct. Acts of cheating include, but are not limited to, the following:

- plagiarism
- copying or attempting to copy from others during an examination or on an assignment
- communicating test information with another person during an examination
- allowing others to do an assignment or portion of an assignment
- using a commercial term paper service.

Attendance: A student who fails to attend the first meeting of a class will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student's status will be the same as that of any other student who desires to add a class. It is the student's responsibility to drop or officially withdraw from the class. See [General Catalog](#) for details.

Regular attendance in all classes is expected of all students. A student whose continuous, unexcused absences exceed the number of hours the class is scheduled to meet per week may be dropped.

Absences attributed to the representation of the college at officially approved events (conferences, contests, and field trips) will be counted as excused absences.

Other Course Information

Shop/Lab Area Safety

- Safety test must be passed to work in the shop and complete required lab exercise.
- Safety glasses are required to be worn at all times while in the shop area, safety glasses are the student's responsibility (students not wearing safety glasses will be asked to leave lab for that day, no exceptions).
- Clean up your area and any other loose debris, trash, or spills.
- Wear all required safety protection and comply with posted signs.
- No shorts or open toe footwear, always be prepared for lab exercises.
- Comply with tool check out policy and clean tools before returning.
- Damaged or missing tools must be reported immediately. Tools are the students' responsibility.
- Do not perform any work on any vehicle outside the assigned task without permission from your instructor.
- Long hair must be kept in a ponytail or tucked away for safety.
- Jewelry such as rings and necklaces must be put away or tucked in for safety.
- Lab work will cease 20 minutes prior to end of class to allow time for cleaning areas and returning tools.

Projects

- All projects must be approved by instructor and require a written work order.
- All projects must be removed from campus prior to finals.
- Projects are taken with students at end of class unless approved by instructor.

In addition to standard course curriculum, portions of this course will prepare you for ASE certifications.

Anticipated Class Schedule/Calendar

*****Subject to change without prior notice*****

Date or Week	Activity, Assignment, and/or Topic	Pages/ Due Dates/Tests
Week 1	Syllabus & Introduction Chapter 1: Intro to Diesel Engines Chapter 2: Shop Safety	Safety Test Review Questions Pages 25-26 & 35-36
Week 2	Chapter 3: Tools, Precision Tools & Fasteners Chapter 10: Lubrication Systems Chapter 11: Cooling Systems	Chapter 1&2 Review Questions homework due Pages 37-59
Week 3	Chapter 14: Diesel Fuels Chapter 15: Basic Fuel Systems Chapter 16: Fuel Filters & Conditioners Chapter 17: Injection System Fundamentals	Chapter 3 Review Questions homework due Pages 201-229
Week 4	Chapter 22: Basics of Electricity Chapter 24: Diesel Engine Charging Systems	Chapter 14 Review Questions homework due Pages 318-319
Week 5	Chapter 28: Career Opportunities & ASE Certification Chapter 29: Workplace Employability Skills	Chapter 24 Review Questions homework due Pages 510-511
Week 6	Chapter 25: Diesel Starting Systems Chapter 27: Preventative Maintenance & Troubleshooting FINAL EXAM	Chapter 25 Review Questions homework due Pages 528-529
