

Basic Course Information					
Semester:	Winter 2025	Instructor Name:	Dr. Arturo Marquez Jr.		
Course Title & #:	Physical Anthropology 100	Email:	arturo.marquezjr@imperial.edu		
CRN #:	15241	Webpage (optional):	n/a		
Classroom:	Online	Office #:	2735		
Class Dates:	Jan. 02 – Feb. 03	Office Hours:	By appointment		
Class Days:	Online	Office Phone #:	760-355-6282		
Class Times:	Online	Emergency Contact:	760-355-6144		
		Class			
Units:	3	Format/Modality:	Asynchronous		

### **Course Description**

Physical anthropology is the study of humans as biological beings subject to the forces of both evolution and culture. Physical anthropology studies humans in a biological context and explains our relationship to other primates and the rest of the natural world. Throughout the course we will examine anatomical, behavioral, and genetic similarities and differences among the living primates, and by illustrating the scientific method, learn the basic mechanism of the evolutionary processes and trace a pathway of human evolution in relation to environmental adaptation as reconstructed from the fossil record. (CSU/UC)

## Course Prerequisite(s) and/or Corequisite(s)

There are no prerequites and/or corequisites for this course.

#### **Student Learning Outcomes**

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

- 1) Define the main goals and aims of physical anthropology.
- 2) Explain how Darwin's theory of natural selection results in evolution, adaptation, and design, and how evolution affects our daily lives.
- 3) Explain the basic pattern of hominid evolution over the last seven million years including dating methods, scientific methods, and the origin of Homo sapiens in Africa including global biological diversity.

## **Course Objectives**

Upon satisfactory completion of the course, students will be able to:

- 1) Define anthropology and describe its four major subfields, stating the major areas of research within physical anthropology.
- 2) Recall the development of evolutionary theory and individuals that contributed to its development.
- 3) Explain the basic principles of Mendelian, molecular and population genetics.
- 4) Formulate an argument for the importance of genetic variations and demonstrate how natural selection works with variation, including variation in skin color.
- 5) List an overview of dating techniques and recreate the geologic time scale in regards to vertebrae and mammalian evolution as it pertains to the human fossil record.
- 6) Use comparative primate taxonomy of commonly known primates in terms of physical characteristics, primate social behaviors and geographical locations, including the differences between the traditional and the cladistic taxonomic classification.

7) Recognize the major groups of hominin fossils and describe alternate phylogenies for human evolution. Identify the biological and cultural factors responsible for human variation.

## **Textbooks & Other Resources or Links**

This is the required textbook this semester:

• Explorations: An Open Invitation to Biological Anthropology, 2<sup>nd</sup> Edition. 2023. Beth Shook, Katie Nelson, Kelsie Aguilera, and Lara Braff, editors. American Anthropological Association. Creative Commons (non-commercial) License.

ISBN (ebook): 978-1-931303-82-8 ISBN (print): 978-1-931303-81-1

Available for download here: https://explorations.americananthro.org/

### **Course Requirements and Instructional Methods**

The Department of Education policy states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time and two (2) hours of out-of-class time per week over the span of a semester. Because this is a three-credit course, students should expect to invest a minimum of nine hours per week.

This is an intensive 5-week course. Students need to dedicate time to this course on a daily basis in order to succeed. Students are assessed based on the following weekly assignments:

- **Discussion Posts** (40 points): There are two (2) posts due every week which synthesize key ideas in this course. To earn the available 4 points per post, it is crucial to post a minimum 150-word response to each prompt including evidence from the textbook, specifically by including quotes and chapter/page numbers from the readings. It is important to draw clear connections to the readings by providing quotes and the corresponding chapter/page numbers where students found key terms, concepts, and examples for their discussion post. For Week 1, Discussion post 1 is due Friday January 3<sup>rd</sup> and Discussion post 2 is due Saturday January 4<sup>th</sup>. Thereafter, Discussion posts 3, 5, 7, and 9 are due on Tuesday at 11:59pm, and Discussion posts 2, 4, 6, 8, and 10 are due on Thursday at 11:59pm.
- Comments (10 points total): After publishing a discussion post, students are expected to read through posts and provide one (1) constructive 50-word comments to colleagues' posts. Comments are worth one (1) point each. For Week 1, comments for discussion post 1 are due Saturday January 4<sup>th</sup> and comments for discussion post 2 are due Sunday January 5<sup>th</sup>. Thereafter, comments for discussion posts 3, 5, 7, and 9 are due on Wednesday at 11:59pm, and comments for discussion posts 4, 6, 8, and 10 are due on Friday at 11:59pm.
- **Projects** (50 points): There is a project at the end of each week that consolidates key ideas in the readings. Projects require time and attention it is important to review project guidelines at the beginning of each week to start working on these as soon as possible. Projects are worth 10 points each and are due at the end of each week on Sunday at 11:59pm.
- Quizzes (50 points): There is a quiz at the end of each week based on the readings. Quizzes are timed students must complete the quiz within 1 ½ hours after they have begun. If you experience any difficulty accessing a quiz, please contact the instructor as soon as possible. Quizzes are worth 10 points each.
- Final Project (50 points) Students will complete a Final Project which synthesizes key ideas discussed throughout
  the semester. The Final Project will take the form of a slide presentation that is uploaded on the course Padlet by
  Friday January 31<sup>st</sup> at 11:59pm. Students will review peers' projects and comment on at least two projects by
  Monday February 3<sup>rd</sup> at 11:59pm.
- **Final Exam** (50 points): A cumulative final exam will be available at the end of the last week. This is a timed exam on Canvas that closes on Sunday February 3<sup>rd</sup> at 11:59pm.

# **Course Grading Based on Course Objectives**

There is a total of 250 points possible in this course. Points earned will be caculated into percentages which correspond to the following final letter grade:

5	•	
Percentage (Canvas)		Letter Grade
100% - 90%		А
89% - 80%		В
79% - 70%		С
69% - 60%		D
59% - below		F

## Academic Honesty (Artificial Intelligence -AI)

IVC values critical thinking and communication skills and considers academic integrity essential to learning. Using AI tools as a replacement for your own thinking, writing, or quantitative reasoning goes against both our mission and academic honesty policy and will be considered academic dishonesty, or plagiarism unless you have been instructed to do so by your instructor. In case of any uncertainty regarding the ethical use of AI tools, students are encouraged to reach out to their instructors for clarification.

### **Accessibility Statement**

Imperial Valley College is committed to providing an accessible learning experience for all students, regardless of course modality. Every effort has been made to ensure that this course complies with all state and federal accessibility regulations, including Section 508 of the Rehabilitation Act, the Americans with Disabilities Act (ADA), and Title 5 of the California Code of Regulations. However, if you encounter any content that is not accessible, please contact your instructor or the area dean for assistance. If you have specific accommodations through *DSPS*, contact them for additional assistance.

We are here to support you and ensure that you have equal access to all course materials.

#### **Course Policies**

Consistent participation in the discussion board and projects is crucial. If you experience any difficulty that keeps you from actively participating in this course, please inform the instructor as soon as possible.

Late work is accepted *only if* the instructor is informed with a detailed justification. If you experience any difficulty that impedes your ability to submit work by a due date, please inform the instructor as soon as possible. Meeting with the instructor (via Zoom) is ideal to address these situations. Make-up quizzes may be allowed at the instructor's discretion.

In order to achieve our course objectives, it is important to foster an engaged learning environment that is respectful and welcoming of everyone in class. Please refrain from behavior that might stifle or hinder others' learning and participation in this course. It is important to be respectful to others when commenting on their opinions and perspective, keeping in mind the aim is to actively learn about the evolution of human biology and diversity. Offensive language will not be tolerated. Please contact the instructor with any questions or concerns.

Plagiarism is a serious offense and will result in adverse consequences. Plagiarism is presenting someone else's work as one's own without citing the original source. It is crucial students understand the seriousness of plagiarism. Please do not copy and paste work from online sources or our textbook. Students are encouraged to reference their sources but always in a way that highlights their original ideas and clearly cites their sources. If you are unsure about IVC's plagiarism policy, please contact the instructor or refer to IVC's student services.

### **Other Course Information**

The instructor may modify the syllabus as necessary to ensure the learning objectives are met. If there are any modifications to the syllabus, students will be notified via email within 24 hours.

Office hours are available via Zoom. Please email the instructor to discuss a day and time to meet. Office hours are additional resource in your professional trajectory at IVC. The instructor is *always* open to dialogue and is committed to your success. Use office hours to receive one-to-one guidance on discussion posts, projects, quizzes, or final exam. Moreover, use office hours to discuss the many merits of anthropology as a major, or to discuss ways anthropology can contribute to your professional development beyond IVC.

### **Financial Aid**

Your Grades Matter! In order to continue to receive financial aid, you must meet the Satisfactory Academic Progress (SAP) requirement. Makings SAP means that you are maintaining a 2.0 GPA, you have successfully completed 67% of your coursework, and you will graduate on time. If you do not maintain SAP, you may lose your financial aid. If you have guestions, please contact financial aid at finaid@imperial.edu.

### **IVC Student Resources**

IVC wants you to be successful in all aspects of your education. For help, resources, services, and an explanation of policies, visit <u>http://www.imperial.edu/studentresources</u> or click the heart icon in Canvas.

## **Anticipated Class Schedule/Calendar**

Date or Week	Activity, Assignment, and/or Topic	Pages/ Due Dates/Tests	
Week 1 January 02 – 05	The Scientific Method in Physical AnthropologyChapter 1 – Introduction to Biological AnthropologyChapter 2 – A History of Evolutionary Thought	<ul> <li>Discussion post 1         <ul> <li>Comments 1</li> </ul> </li> <li>Discussion post 2             <ul> <li>Comments 2</li> </ul> </li> <li>Project 1         <ul> <li>Quiz 1</li> </ul> </li> </ul>	
Week 2 January 6 – 12	Genetics and Evolution Chapter 3 – Molecular Biology and Genetics Chapter 4 – Forces of Evolution Chapter 17 – Social and Biopolitical Dimensions of Evolutionary Thinking	<ul> <li>Discussion post 3         <ul> <li>Comments 3</li> </ul> </li> <li>Discussion post 4         <ul> <li>Comments 4</li> </ul> </li> <li>Project 2</li> <li>Quiz 2</li> </ul>	
Week 3 January 13 – 19	Primatology and Fossils Chapter 5 – Meet the Living Primates Chapter 6 – Primate Ecology and Behavior Chapter 7 – Stones and Bones: Studying the Fossil Record Chapter 8 – Primate Evolution	<ul> <li>Discussion post 5         <ul> <li>Comments 5</li> </ul> </li> <li>Discussion post 6         <ul> <li>Comments 6</li> <li>Project 3</li> <li>Quiz 3</li> </ul> </li> </ul>	
Week 4 January 20 – 26	Early Hominins	Discussion post 7     O Comments 7	

Date or Week	Activity, Assignment, and/or Topic	Pages/ Due Dates/Tests	
	Chapter 9 – Early Hominins Chapter 10 – Early Members of the Genus Homo Chapter 11 – Archaic Homo Chapter 12 – Modern Homo <i>sapiens</i>	<ul> <li>Discussion 8 <ul> <li>Comments 8</li> </ul> </li> <li>Project 4</li> <li>Quiz 4</li> </ul>	
Week 5 January 27 – February 03	Human Variation and Evolution Chapter 13 – Race and Human Variation Chapter 14 – Human Variation: An Adaptive Significance Approach Chapter 16 – Contemporary Topics: Human Biology and Health	<ul> <li>Discussion post 9 <ul> <li>Comments 9</li> </ul> </li> <li>Discussion 10 <ul> <li>Comments 10</li> </ul> </li> <li>Project 5</li> <li>Quiz 5</li> <li>Final Project</li> <li>Final Exam</li> </ul>
