The online version of this course is not self-paced. There are strict deadlines that need to be met every week. You will be given a list of weekly deliverables that you will be responsible for. You can find these under the appropriate weekly heading (i.e. Week 1). Any questions you may have about the course can be posted in the 'Ask the Instructor' forum inside Canvas.

Out of Class Assignments: The Department of Education policy states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time and two (2) hours of out-of-class time per week over the span of a semester. WASC has adopted a similar requirement.

THE GENERAL PLAN:

This course is designed much differently from most others you have been exposed to because you will be asked to think critically about the subject matter throughout the semester. All of your activities will focus on helping you to better understand the logic of philosophy, and to come to think like a rational philosopher. You will be asked to continually engage your mind during your studies.

While you will learn some facts about philosophy, they will be learned in the context of learning about the logic of philosophy, rather than being memorized for test time. The class will focus on figuring out things using your own mind, not memorizing what is in a textbook. You will be regularly responsible

for assessing your own work using the criteria found in this syllabus. This is an eight-week course, so you will have a lot of work to do.

GENERAL INFORMATION:

- Always check the Announcements before you start your work online.
- If you have a question that is personal in nature, for example, a question about your grade, send me an email at Kathy.rodriguez@imperial.edu
- If you email me be sure to include your entire name, section # of the class, and the name of the class, (CSI 100).
- I will respond to all emails within 24 hours.

IMPORTANT STUFF:

Research Assignments or Book Assignments:

You will have a one-week window to submit your essay. All essays should be in 12-point type. The essay prompts will be in the Announcements and the Module. Submit your essays before the dates given in this syllabus. No late essays allowed.

Posts:

Everyone must post at least once on each module and post at least in reply to another student's post. I expect your posts to reflect your careful study of the important issues the philosophers present. There is no set length for posts, however, try to keep your posts at a minimum of 100 words per peer (2) and 300 words for your initial post. Your posts should make use of information and examples in the videos and/or in the readings. Your replies to other students should discuss the ideas presented in their posts. There is no set length for replies, but usually a paragraph will suffice. If you are not going into enough detail in your posts and replies, I'll let you know in the feedback section.

No late posts allowed. Your posts must be submitted during the time frame listed on the course schedule.

Always run your posts through spell-check before you post. Remember to check your word use and spelling with a dictionary and always use a thesaurus to achieve the precision fitting of a clear critical thinker. Posting and sending email is a formal endeavor with this professor. All forms of communication, in all my classes, require civility and respect. I will not tolerate disrespectful emails or posts, and I insist that everyone be courteous to everyone else. I will immediately withdraw from any student who does not adhere to the basics of civility required of cooperative learning. Do not hold personal conversations between each other through posts.

I will give you feedback on each of your posts and grade them on Monday following the due date. What should I do with the feedback? You can use it to improve your future posts.

Quizzes:

There will be a total of 8 quizzes throughout the semester. Each quiz is worth 10 points and will consist of true/false, multiple choice, and fill in the blank questions on the readings and videos.

GRADING CRITERIA

What Each Grade Represents:

THE GRADE OF F:

Here are typical characteristics of the work of a student who receives an F.

A close examination reveals:

The student does not understand the basic nature of philosophical reasoning and argumentative writing, and in any case does not display the philosophical reasoning and argumentative writing skills and abilities which are at the heart of this course. The work at the end of the course is vague, imprecise, and unreasoned as it was in the beginning. There is little evidence that the student is genuinely engaged in the task of taking charge of his or her thinking. Many assignments appear to

have been done pro forma, the student simply going through the motions without really putting any significant effort into thinking his or her way through them. Consequently, the student is not analyzing issues clearly, not formulating information clearly, not accurately distinguishing the relevant from the irrelevant, not identifying key questionable assumptions, not clarifying key concepts, not identifying relevant competing points of view, not reasoning carefully from clearly stated premises, or tracing implications and consequences. The student's work does not display discernible reasoning, problem solving, and argumentative writing skills.

stated premises, or tracing implications and consequences. The student's work does not display discernible reasoning, problem solving, and argumentative writing skills.

THE GRADE OF D:

D level work shows only a minimal level of understanding of what philosophical reasoning and argumentative writing is, along with the development of some, but very little, philosophical reasoning and argumentative writing skills or abilities. D work at the end of the course, overall, shows only occasional philosophical reasoning skills, but frequent uncritical thinking. Most assignments are poorly done. There is little evidence that the student is reasoning through the assignment. Often the student seems to be merely going through the motions of the assignment, carrying out the form without getting into the spirit of it. D work rarely shows any effort to take charge of ideas, assumptions, inferences, and intellectual processes. In general, D level thinking lacks discipline and clarity. In D level work, the student rarely analyzes issues clearly and precisely, almost never formulates information clearly, rarely distinguishes the relevant from the irrelevant, rarely recognizes key questionable assumptions, almost never clarifies key concepts effectively, frequently fails to use language in keeping with educated usage, only rarely identifies relevant competing points of view, and almost never reasons carefully from clearly stated premises, or recognizes important implications and consequences. D level work does not show good reasoning and problem-solving skills and frequently displays poor reasoning, problem solving, and argumentative writing skills.

THE GRADE OF C:

C level work illustrates some but inconsistent achievement in grasping what philosophical reasoning and argumentative writing is, along with the development of modest critical thinking and argumentative writing skills or abilities. C level work at the end of the course, it is true, shows some emerging philosophical reasoning and argumentative writing skills, but also pronounced weaknesses as well. Though some assignments are reasonably well done, others are poorly done; or at best are mediocre. There are more than occasional lapses in reasoning. Though philosophy terms and distinctions are sometimes used effectively, sometimes they are used quite ineffectively. Only on occasion does C level work display a mind taking charge of its own ideas, assumptions, inferences, and intellectual processes. Only occasionally does C level work display intellectual discipline and

clarity. The C level student only occasionally analyzes issues clearly and precisely, formulates information clearly, distinguishes the relevant from the irrelevant, recognizes key questionable assumptions, clarifies key concepts effectively, uses language in keeping with educated usage, identifies relevant competing points of view, and reasons carefully from clearly stated premises, or recognizes important implications and consequences. Sometimes the C level student seems to be simply going through the motions of the assignment, carrying out the form without getting into the spirit of it. On the whole, C level work shows only modest and inconsistent reasoning, problem solving, and argumentative writing skills, and sometimes displays weak reasoning, problem solving, and argumentative writing skills.

THE GRADE OF B:

B-level work represents demonstrable achievement in grasping what philosophy and argumentative writing is, along with the clear demonstration of a range of specific philosophical reasoning and argumentative writing skills or abilities. Level B at the end of the course is, on the whole, clear, precise, and well-reasoned, though with occasional lapses into weak reasoning. On the whole, philosophy terms and distinctions are used effectively. The work demonstrates a mind beginning to take charge of its own ideas, assumptions, inferences, and intellectual processes. The student often analyzes issues clearly and precisely, often formulates information clearly, usually distinguishes the relevant from the irrelevant, often recognizes key questionable assumptions, usually clarifies key concepts effectively, typically uses language in keeping with educated usage, frequently identifies relevant competing points of view, and shows a general tendency to reason carefully from clearly stated premises, as well as noticeable sensitivity to important implications and consequences. B level work displays good reasoning, problem solving and argumentative writing skills.

THE GRADE OF A:

A level work demonstrates real achievement in grasping what philosophical reasoning and argumentative writing is, along with the clear development of a range of specific philosophical reasoning and argumentative writing skills or abilities. The work at the end of the course is, on the whole, clear, precise, and well-reasoned, though with occasional lapses into weak reasoning. In A-level work, philosophy terms and distinctions are used effectively. The work demonstrates a mind beginning to take charge of its own ideas, assumptions, inferences, and intellectual processes. The A-level student often analyzes issues clearly and precisely, often formulates information clearly, usually distinguishes the relevant from the irrelevant, often recognizes key questionable assumptions, usually clarifies key concepts effectively, typically uses language in keeping with educated usage, frequently identifies relevant competing points of view, and shows a general tendency to reason carefully from clearly stated premises, as well as noticeable sensitivity to important implications and consequences. A-level work displays excellent reasoning, problem-solving, and argumentative writing skills. The A student's work is consistently at a high level of excellence.

For online courses, students who fail to complete required activities for the first week and two consecutive weeks from Week 2 on may be considered to have excessive absences and may be dropped.

Absences attributed to the representation of the college at officially approved events (conferences, contests, and field trips) will be counted as 'excused' absences.

Academic Honesty

- Plagiarism is taking and presenting as one's own writings or ideas of others, without citing the source.
 You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to "cite a source" correctly, you must ask for help.
 - Anyone using AI for their assignments will receive a 0 for the entire assignment. NO tolerance for AI
- Cheating is defined as fraud, deceit, dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.

Student Equity Program

- The Student Equity Program strives to improve Imperial Valley College's success outcomes, particularly for students who have been historically underrepresented and underserved. The college identifies strategies to monitor and address equity issues, making efforts to mitigate any disproportionate impact on student success and achievement. Our institutional data provides insight into the student population, who historically, are not fully represented. Student Equity addresses disparities and/or disproportionate impact in student success across disaggregated student equity groups including gender, ethnicity, disability status, financial need, Veterans, foster youth, homelessness, and formerly incarcerated students. The Student Equity Program provides direct supportive services to empower students to experience insecurities related to food, housing, transportation, textbooks, and shower access. We recognize that students who struggle meeting their basic needs are also at an academic and economic disadvantage, creating barriers to academic success and wellness. We strive to remove barriers that affect IVC students' access to education, degree and certificate completion, successful completion of developmental math and English courses, and the ability to transfer to a university. Contact: 760.355.5736 or 760.355.5733 Building 100.
- The Student Equity Program also houses IVC's Homeless Liaison, who provides direct services, campus, and community referrals to students experiencing homelessness as defined by the McKinney-Vento Act. Contact: 760.355.5736 Building 100.
