Course Description

A study of human development from conception to death, including genetics, conception, prenatal development, infancy, toddlerhood, pre-school years, middle childhood, adolescence, early adulthood, middle adulthood, later adulthood, and death. Theories and research of physical, cognitive, personality, and social development are examined, as well as attention to developmental problems. (CSU) (UC credit limited)

Attendance

1. This is a HYFLEX class which means that attendance is mandatory. It is at YOUR discretion if you want to come to campus for in-person learning OR log in online via Zoom. Whatever you decide to choose, you will be required to be in class and ready to go at that assigned time. ** *This could change depending on CDC guidelines.***

2. A student who fails to attend the first meeting of a class or does not complete the first mandatory activity of an online class will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student's status will be the same as that of any other student who desires to add a class. It is the student's responsibility to drop or officially withdraw from the class. See General Catalog for details.

3. Regular attendance in all classes is expected of all students. A student whose continuous, unexcused absences exceed the number of hours the class is scheduled to meet per week may be dropped. For online courses, students who fail to complete required activities for two consecutive weeks may be considered to have excessive absences and may be dropped.

Student Learning Outcomes

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

- 1. Identify and demonstrate understanding of the physical milestones from conception to death. (ILO1, 2, 3, 5)
- 2. Identify and demonstrate understanding of the cognitive development patterns from conception to death. (ILO1, 2, 3, 5)
- 3. Identify and demonstrate understanding of Erikson's stages of psychosocial development. (ILO1, 2, 3, 5)

Course Objectives

Upon satisfactory completion of the course, students will be able to:

1. Contrast and compare developmental theories and approaches (including how different theoretical perspectives affect or determine the research and applications that arise from them)

2. Analyze elements of a scientific approach to understanding human development in a biopsychosocial context

3. Identify biological, psychological, and sociocultural influences on lifespan development

4. Describe the ways in which psychological principles and research apply to real world problems and issues across the lifespan

5. Describe the sequences of physical, social, and cognitive development across the lifespan, using the constructs and conceptual framework provided by psychological perspectives

6. Identify and describe the techniques and methods used by developmental psychologists to study human development

7. Identify and describe classic and contemporary theories and research in lifespan psychology

8. Describe the developing person at different periods of the lifespan

Course Requirements and Instructional Methods

Modules Section in CANVAS: You will find all the information. I have broken it up by chapters. In the section, you will see Power-point slides, videos, and possibly additional information to help you understand the material.

Tests: You will be given a test for every 3 chapters.

Individual Paper: You will select a topic that is mentioned in the book. You will then write a 5 page paper about that topic. Provide reasoning as to why you selected that topic in the introduction of your paper. The paper will be 12 font Times New Roman, Double Spaced. You will also need to provide a Works Cited page as well. You will turn this in via CAVAS. You will received a ZERO if you steal someone elses' ideas, so it is important that you cite your work.

Course Grading Based on Course Objectives

Other Course Information

COMPLETE YOUR OWN COURSEWORK.

- When you register for an online class and log-in to Canvas, you do so with the understanding that you will produce your own work, take your own exams, and will do so without the assistance of others (unless directed by the instructor).

Examples of Academic Dishonesty that can occur in an online environment:

- Copying from others on a quiz, test, examination, or assignment
- Allowing someone else to copy your answers on a quiz, test, exam, or assignment
- Having someone else take an exam or quiz for you
- Conferring with others during a test or quiz (if the instructor didn't explicitly say it was a group project, then he/she expects you to do the work without conferring with others)
