

Basic Course Information

Semester:	Spring 2024	Instructor Name:	Jia Sun
Course Title & #:	Principles of Biological Science – Biol 100	Email:	jia.sun@imperial.edu
CRN #:	20020	Webpage (optional):	N/A
Classroom:	2711	Office #:	2778
Class Dates:	2/12/24– 6/7/24	Office Hours:	In-person: MW 1045-1115AM Via Pronto: TR 11AM-1230PM or via appt.
Class Days:	Monday	Office Phone #:	(760) 355-6521
Class Times:	420PM-730PM	Emergency Contact:	jia.sun@imperial.edu
Units:	4	Class Format:	Hybrid

Course Description

A comprehensive one semester general biology course for non-majors. Includes life from the molecular to the organismic level of both plants and animals and their interactions within the environment. Special emphasis is put on human biology within appropriate areas of study. Appropriate for general education as well as nursing, pre-professional, and higher level biology courses. Includes laboratory component. (UC credit limited. See a counselor.) (CSU/UC)

Course Prerequisite(s) and/or Corequisite(s)

Appropriate placement as defined by AB705; or MATH 091 or MATH 098 with a grade of "C" or better.

Student Learning Outcomes

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

1. demonstrate an understanding of the steps of the scientific method. (ILO2)

Course Objectives

Upon satisfactory completion of the course, students will be able to:

1. identify the basic characteristics of all living things.
2. name basic chemical aspects that pertain to life and the concept of homeostasis.
3. describe the subcellular components of the cell including their structure and function.
4. explain the light and dark reactions of photosynthesis.
5. explain cellular respiration and its relations to the entire organism.
6. demonstrate knowledge of the structure and function of DNA and RNA.
7. explain protein synthesis and site the central dogma of cell biology.
8. compare and contrast the fundamentals of asexual and sexual reproduction.
9. define ecology and the overall impact of ecology to conditions in the environment.

10. solve problems in general genetics and in human genetics and relate advances in genetics to social responsibility of geneticists.
11. identify and relate the functions of the major systems of the human body; the interrelationship among body systems and nature of disease.
12. classify organisms in the kingdoms of plants and animals, discuss their evolutions and their relationships.

Textbooks & Other Resources or Links

1. Hoefnagels, Mariëlle. **Biology: The Essentials 4th edition with Connect (Digital only)** ISBN: 9781265505790
2. **Lab Manual: Biology 100 Lab Manual (9781307871074)**

Course Requirements and Instructional Methods

Students will be able to describe various cellular processes such as photosynthesis, aerobic cellular respiration, enzymatic reactions, mitosis, and meiosis. Students will acquire a general knowledge of genetics and how genetic information is passed to offspring. Students will learn about the origin of life on Earth and how organisms underwent adaptation and evolution to give rise to life as we know it today. Students will learn the functions of the major systems of the human body, and some ways that these systems work cooperatively to maintain critical life functions.

Connect Reading Assignment:

Digital reading assignment using the McGraw Hill Connect assessment platform will accompany course notes each week to reinforce concepts introduced in class, access to this platform is already included with the textbook package. A total of twenty (20) assignments will be assigned over the course of the semester, the lowest three (3) assignments will be dropped.

Discussions:

Discussions are an important component of many online classes. They replicate in-class (face-to-face) discussions, so they can be fertile ground for exploratory learning. They can also be fertile ground for self-assessment. When students are directed to consciously compare their ideas or their participation with other participants in the class, they may be able to adjust their participation (both quantity and quality) to meet the bar set by other students. A total of six (6) discussions will take place online over the course of the semester.

Exams:

The course includes four (4) equally weighted lecture exams. The lowest (1) exam will be dropped.

Labs:

In-person and Labster simulated laboratory experiments will be conducted over the semester. A total of ten (10) labs will be assigned over the course of the semester. The lowest (1) lab will be dropped.

Lab Exams:

The course includes two (2) equally weighted lab exams.

Out of Class Assignments: The Department of Education policy states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time and two (2) hours of out-of-class time per week over the span of a semester. WASC has adopted a similar requirement.

THE LAST DAY TO DROP THE COURSE WITH A 'W' IS 5/11

Course Grading Based on Course Objectives

Lecture Exams	(4-1) x 60pts	180pts	dropped: 1
Labs	(10-1) x 30pts	270pts	dropped: 1
Connect Reading Assignments	(20-3) x 10pts	170pts	dropped: 3
Discussions	6 x 20pts	120pts	
Lab Exams	2 x 100pts	200pts	

		940pts	

The Following grade cutoffs are guaranteed:
 A: > 90%; B: > 80%; C: > 70%; D: > 60%

Course Policies

In a hybrid course, student participation is equal to attendance for the online portion of the course. Your active participation throughout the course is required both for your success in the class as well as the primary proof of your attendance in the course. In compliance with the campus attendance/participation policy posted below, ***any student that does not complete the required first week's activities can be dropped from the course.*** After the first week, any students that fail to complete assignments for one week, or is absent for one week of labs, may be dropped from the course if I am not notified ahead of time.

Absences attributed to the representation of the college at officially approved events (conferences, contests, and field trips) will be counted as 'excused' absences.

As this is a hybrid course, please also review the Netiquette guidelines for online interactions in the Course Logistics folder.

Academic honesty in the advancement of knowledge requires that all students and instructors respect the integrity of one another's work and recognize the important of acknowledging and safeguarding intellectual property.

- Plagiarism is taking and presenting as one's own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to "cite a source" correctly, you must ask for help.
- Cheating is defined as fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.

Anyone caught cheating or plagiarizing will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Acts of cheating include, but are not limited to, the following: (a) plagiarism; (b) copying or attempting to copy from others during an examination or on an assignment; (c) communicating test information with another person during an examination; (d) allowing others to do an assignment or portion of an assignment; (e) using a commercial term paper service.

Artificial Intelligence (A.I.) IVC values critical thinking and communication skills and considers academic integrity essential to learning. Using AI tools as a replacement for your own thinking, writing, or quantitative reasoning goes against both our mission and academic honesty policy and will be considered academic dishonesty, or plagiarism unless you have been instructed to do so by your instructor. In case of any uncertainty regarding the ethical use of AI tools, students are encouraged to reach out to their instructors for clarification.

IMPERIAL VALLEY COLLEGE

Anticipated Class Schedule/Calendar

WK	LECTURE (ASYNCHRONOUS ONLINE)	LAB (IN-PERSON)
1	The Scientific Method (1)	Lab Introduction/Lab Safety (Labster)
2	Chemistry of Life (2)	HOLIDAY/Food Macromolecules (Labster)
3	Cellular physiology (3)	Microscopy (2.3-2.5)
4	Cellular Energetics (4-6)	EXAM I
5	Cellular Energetics (4-6)	Enzymes (5.1-5.4)
6	DNA Structure and Reproduction (7)	EXAM II
7	Cell Division (8/9)	Mitosis (8)
<i>SPRING BREAK 4/1 – 4/6</i>		
8	Genetics (10)	LAB EXAM I
9	Animal Body/Digestive/Urinary Systems (23/28)	Fetal Pig Dissection (27/29)
10	Cardiovascular/Respiratory Systems (27)	Fetal Pig Dissection (27/29)
11	Immunology (29) FINAL 'W' DROP DATE 5/11	Embryology (Labster)
12	Nervous System (24)	EXAM III
13	Evolution (12/13)	Bloodtyping ABO (Worksheet)
14	Natural Selection and Speciation (14)	LAB EXAM II
15	Ecology (19)	HOLIDAY/Competition (Labster)
16	EXAM IV	EXAM IV
