#### **Course Description**

This course focuses on the appropriate use of assessment and observation strategies to document development, growth, play and learning in order to join with families and professionals in promoting children's success and maintaining quality programs. Recording strategies, rating systems, portfolios, and multiple assessment methods are explored, along with strategies for collaboration with families and professionals. (C-ID ECE 200) (CSU)

### **Course Prerequisite(s) and/or Corequisite(s)**

Prerequisite: CDEV 104 with a grade of "C" or better.

#### **Student Learning Outcomes**

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

- 1. Describe and evaluate the characteristics, strengths, limitations and applications of contemporary observation and assessment tools. (ILO1 and ILO2)
- 2. Discuss the role of partnerships with families and other professionals in utilizing interpretations of observational and assessment data. (ILO1 and ILO2)
- 3. Complete systematic observations and assessments using a variety of methods of data collection to inform environment design, interactions, and curriculum. (ILO2)

## **Course Objectives**

Upon satisfactory completion of the course, students will be able to:

- 1. Compare historic and currently used observation and assessment tools.
- 2. Identify logistical challenges, biases, and preconceptions about observing and assessing children.
- 3. Identify the purpose, value and use of formal and informal observation and assessment strategies.
- 4. Describe the major characteristics, strengths and limitations of selected assessment tools.
- 5. Apply knowledge of development to interpret observations and assessments.
- 6. Complete systematic observations using a variety of methods of data collection to assess the impact of the environment, interactions and curriculum on children's development and behavior.
- 7. Demonstrate the ability to use observation and assessment in decision making for instruction, referral, and intervention.
- 8. Describe legal and ethical responsibilities in relationship to observation, documentation, and record keeping.

### **Course Requirements and Instructional Methods**

**Lectures and Participation:** There will be in-class discussions in groups that involve the students using the knowledge, ideas and skills presented in class. This participation/assignment is completed during the class meeting. (If a student did not attend class, this assignment cannot be made up.)

**Informational Assignments:** There are several Informational Assignments that are to help you be successful in the course.

**Read and Reflect Assignments:** Teachers are thinkers. The Read and Reflect assignments provide students with the opportunity to reflect on the ideas provided in reading assignments and communicate how the information will enhance their teaching skills.

**Observation Assignments:** An important role of the teacher is that of listener and observer. To support the development of observation and listening skills as well as the ability to gain insight from interpreting children's conversations, children's behavior, the teacher's role in the classroom, and the role of the environment in supporting learning, students will be required to complete a variety of observation assignments. The student will use written guidelines provided by the instructor. During

this semester, some of the observations will be done online using video provided by the instructor and other observation assignments will be done at the Imperial Valley Child Development Center. In order to observe at the IVC Child Development Center, students are required to have up-to-date immunizations as required by the state of California. Student are required to make an appointment at the IVC School Health Center. Detailed information will be provided by the instructor.

**Child Portfolio/Documentation Assignment:** Documentation is an important strategy to communicate children's learning. Students will work in class and at home to complete a single page documentation which will include pictures, observations, dialogue from the children (if available), and interpretation. Additional guidelines will be provided by the instructor.

**Environment Assignment**: The Environment is the "Third Teacher" in the classroom. Students are provided the opportunity to learn strategies to evaluation the quality of the classroom learning environment. Students will be provided with written guidelines by the instructor.

**CLASS Assignment**: CLASS (Classroom Assessment Scoring System) is a tool used in the field of Early Childhood Education. CLASS is a tool for observing and assessing the effectiveness of interactions among teachers and children in classrooms. It measures the emotional, organizational, and instructional supports provided by teachers that have contribute to children's social, developmental, and academic achievement.

**Final Exam: The Final Exam will be taken online, in CANVAS.** The test questions will be shortanswer essay questions. Students will demonstrate their understanding of the information learned from the textbook, from articles provided in class/online, and from lectures.

**<u>Reminder</u>**: The **Department of Education policy** states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time and two (2) hours of out-of-class time per week over the span of a semester. WASC has adopted a similar requirement.

# **Course Grading Based on Course Objectives**

See below.

Course Policies
See the following bellow.
Attendance

A student who fails to attend the first meeting of a class or does not complete the first mandatory activities will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student's status will be the same as that of any other student who desires to add a class. It is the student's responsibility to drop or officially withdraw from the class. See General Catalog for details.

• Attendance and participation in class meetings is required. **Regular attendance in all classes is expected of all students**. A student who misses three consecutive or four non-consecutive classes may be dropped from the class. Students who fail to complete required activities for two consecutive weeks may be considered to have excessive absences and may be dropped. If you have a reason for not being able to attend, you must contact the instructor.

# Academic Honesty

Academic honesty in the advancement of knowledge requires that all students and instructors respect the integrity of one another's work and recognize the important of acknowledging and safeguarding intellectual property.

There are many different forms of academic dishonesty. The following kinds of honesty violations and their definitions are not meant to be exhaustive. Rather, they are intended to serve as examples of unacceptable academic conduct.

- Plagiarism is taking and presenting as one's own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to "cite a source" correctly, you must ask for help.
- Cheating is defined as fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.

Anyone caught cheating or plagiarizing will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to the General Catalog for more information on academic dishonesty or other misconduct. Acts of cheating include, but are not limited to, the following: (a) plagiarism; (b) copying or attempting to copy from others during an examination or on an assignment; (c) communicating test information with another person during an examination; (d) allowing others to do an assignment or portion of an assignment; (e) using a commercial term paper service.

### **Other Course Information**

- **Be Prepared:** purchase your textbook -- your textbook provides you with the in-depth information required to learn and pass the course.
- Log into CANVAS frequently weekly at a minimum: CANVAS contains all of the lectures, assignments, and projects required in the course.
- **Complete Reading:** each week there will be readings assigned in the textbook. Many assignments will include additional articles that the instructor will provide.
- Lecture & Participate: There will be in-class discussions in breakout groups that involve the students in using the knowledge, ideas and skills presented in class.
- **Complete assignments:** Each assignment has been carefully selected as a means of reinforcing the knowledge gleaned throughout the course. If the instructor determines that work turned in is not your own, or that you did not participate fully in group efforts, you may be given a zero with no opportunity for make-up.
- **Be organized**: keep your assignments in a labeled folder for this course in your computer. Label assignments to make it easy to find and upload into CANVAS, for example: "CDEV 105-Journal 1-your name"

- **Be respectful.** Students are expected to show respect for the instructor and classmates when participating.
- Flexibility: the FALL Semester flow of topics and assignments is described on the calendar. However, the instructor may adjust the class to reflect the requirements of the time. Therefore, listed topics of discussion or due dates of assignments may change. Please check for "Announcements" and emails and information on CANVAS for any changes.
