***What Each Grade Represents:***

GRADE OF F:

Here are typical characteristics of the work of a student who receives an F.

A close examination reveals:

The student does not understand the basic nature of philosophical reasoning and argumentative writing, and in any case does not display the philosophical reasoning and argumentative writing skills and abilities which are at the heart of this course. The work at the end of the course is vague, imprecise, and unreasoned as it was in the beginning.

There is little evidence that the student is genuinely engaged in the task of taking charge of his or her thinking. Many assignments appear to have been done pro forma, the student simply going through the motions without really putting any significant effort into thinking his or her way through them. Consequently, the student is not analyzing issues clearly, not formulating information clearly, not accurately distinguishing the relevant from the irrelevant, not identifying key questionable assumptions, not clarifying key concepts, not identifying relevant competing points of view, not reasoning carefully from clearly stated premises, or tracing implications and consequences. The student's work does not display discernible reasoning, problem solving, and argumentative writing skills.

#### THE GRADE OF D:

D level work shows only occasional most assignments are poorly done. There is little evidence that the student is reasoning through the assignment. Often the student seems to be merely going through the motions of the assignment, carrying out the form without getting into the spirit of it. D work rarely shows any effort to take charge of ideas, assumptions, inferences, and intellectual processes. In general, D level thinking lacks discipline and clarity. In D level work, the student rarely analyzes issues clearly and precisely, almost never formulates information clearly, rarely distinguishes the relevant from the irrelevant, rarely recognizes key questionable assumptions, almost never clarifies key concepts effectively, frequently fails to use language in keeping with educated usage, only rarely identifies relevant competing points of view, and almost never reasons carefully from clearly stated premises, or recognizes important implications and consequences. D level work does not show good reasoning and problemsolving skills and frequently displays poor reasoning, problem solving, and argumentative writing skills.

#### THE GRADE OF C:

C level work illustrates some but inconsistent achievement. Though some assignments are reasonably well done, others are poorly done; or at best are mediocre. There are more than occasional lapses in reasoning. Though philosophy terms and distinctions are sometimes used effectively, sometimes they are used quite ineffectively. Only on occasion does C level work display a mind taking charge of its own ideas, assumptions, inferences, and intellectual processes. Only occasionally does C level work display intellectual discipline and clarity. The C level student only occasionally analyzes issues clearly and precisely, formulates information clearly, distinguishes the relevant from the irrelevant, recognizes key questionable assumptions, clarifies key concepts effectively, uses language in keeping with educated usage, identifies relevant competing points of view, and reasons carefully from clearly stated premises, or recognizes important implications and consequences. Sometimes the C level student seems to be simply going through the motions of the assignment, carrying out the form without getting into the spirit of it. On the whole, C level work shows only modest and inconsistent reasoning, problem solving, and writing skills, and sometimes displays weak reasoning, problem solving, and argumentative writing skills.

#### THE GRADE OF B:

B-level work represents at the end of the course is, that the work is overall, clear, precise, and well-reasoned, though with occasional lapses into weak reasoning. Overall, philosophy terms and distinctions are used effectively. The work demonstrates a mind beginning to take charge of its own ideas, assumptions, inferences, and intellectual processes. The student often analyzes issues clearly and precisely, often formulates information clearly, usually distinguishes the relevant from the irrelevant, often recognizes key questionable assumptions, usually clarifies key concepts effectively, typically uses language in keeping with educated usage, frequently identifies relevant competing points of view, and shows a general tendency to reason carefully from clearly stated premises, as well as noticeable sensitivity to important implications and consequences. B level work displays good reasoning, problem solving and argumentative writing skills.

#### THE GRADE OF A:

A level work demonstrates real achievement and the work at the end of the course is, on the whole, clear, precise, and well-reasoned, though with occasional lapses into weak reasoning. In A-level work, philosophy terms and distinctions are used effectively. The work demonstrates a mind beginning to take charge of its own ideas, assumptions, inferences, and intellectual processes. The A-level student often analyzes issues clearly and precisely, often formulates information clearly, usually distinguishes the relevant from the irrelevant, often recognizes key questionable assumptions, usually clarifies key concepts effectively, typically uses language in keeping with educated usage, frequently identifies relevant competing points of view, and shows a general tendency to reason carefully from clearly stated premises, as well as noticeable sensitivity to important implications and consequences. A-level work displays excellent reasoning, problemsolving, and argumentative writing skills. The A student's work is consistently at a high level of excellence.

You will receive a zero for a score if you submit an uploaded document for your assignment. Must be typed in the Canvas box

Academic honesty in the advancement of knowledge requires that all students and instructors respect the integrity of one another's work and recognize the importance of acknowledging and safeguarding intellectual property. ***Anyone using AI for their assignments will receive a 0 for the entire assignment. NO tolerance for AI. Your written assignments must be directly typed into the canvas box. Anyone who uploads or copy and paste the assignment into Canvas will receive a score of zero***

There are many different forms of academic dishonesty. The following kinds of honesty violations and their definitions are not meant to be exhaustive. Rather, they are intended to serve as examples of unacceptable academic conduct. Plagiarism is taking and presenting as one's own writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to "cite a source" correctly, you must ask for help.

Cheating is defined as fraud, deceit, dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.

Anyone caught cheating or plagiarizing will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to the [General Catalog](#) for more information on academic dishonesty or other misconduct. Acts of cheating include, but are not limited to, the

following: (a) plagiarism; (b) copying or attempting to copy from others during an examination or on an assignment; (c) communicating test information with another person during an examination; (d) allowing others to do an assignment or portion of an assignment; (e) using a commercial term paper service.
