Course Description

This course provides an introduction to nursing and the roles of the nurse, as well as profession related and patient care concepts. Emphasis is placed on the knowledge and skills needed to provide safe, quality care. The theoretical foundation for basic assessment and nursing skills is presented, and the student is given the opportunity to demonstrate these skills in a clinical laboratory setting. An introduction to the nursing process provides a decision making framework to assist students in developing effective clinical judgment skills. Utilization of the nursing process and developmental theories (primary Erikson), focus on the nursing role as communicator, provider of care, and patient teacher. Parameters of health are defined. Nursing fundamental concepts are introduced related to physical and psychological assessment needs of the normal and ill individual; pain assessment, interventions and evaluation; basic nutrition; and stress and adaptation concepts. Variations in nursing care for individuals of different socio-economic and cultural backgrounds will be explored. Additional materials fee applies. (CSU).

Course Prerequisite(s) and/or Corequisite(s)

• Course Prerequisites: Admission to the Associate Degree Nursing Program

Corequisites: NURS 109 with a minimum grade of C or better

• Recommended Preparation: NURS 80

Student Learning Outcomes

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

- 1. Demonstrate basic fundamental nursing skills, which will be evaluated through written examinations and ATI Fundamental exam. (ILO1, ILO2).
- 2. Develop a nursing care plan utilizing the nursing process; which will be evaluated by written exam, class presentation and application in the clinical setting. (ILO1, ILO2, ILO3, ILO4).
- 3. Safely administer medication to patients of all ages in lab simulation and in the patient clinical setting. Inclusive: oral, intramuscular and subcutaneous medications, and correct patient identification in accordance with the National Patient Safety Goals and QSEN. (ILO1, ILO2, ILO3, ILO4).

Course Objectives

- 1. Discuss the role of the nurse and scope of practice related to established code of ethics, nurse practice acts, and professional registrations/certifications.
- 2. Review the spectrum of health care settings across which patient care is provided.
- 3. Recognized the importance of selected profession related concepts as they pertain in providing and directing safe, quality patient care.
- 4. Discuss the concepts integral to the provision of safe, quality patient centered care: nursing process, clinical judgment, advocacy, cultural sensitivity, communication and stress, coping and adaptation.
- 5. Appreciate the nurse's role in identifying and supporting selected physiological needs of patients.
- 6. Describe selected concepts and discuss how they relate to providing patient care that is safe for the nurse and patient: medication, administration, documentation, body mechanics and ergonomics, and nursing process.
- 7. Demonstrate basic nursing skills using proper techniques and measures that ensure patient safety.
- 8. Apply the various elements of the nursing process to clinical decision-making.
- 9. Use verbal and nonverbal communication that promotes caring and therapeutic relationships.

See detailed Course Unit Objectives at end of this syllabus.

Course Requirements and Instructional Methods

This course is face-to-face instruction and will be conducted in a classroom, simulation lab setting and clinical location in the community. The class session will be listed on the syllabus calendar schedule.

- Assignments will be posted online through CANVAS. Students must have computer, audio and visual capabilities.
 Audio Visual aids are required for viewing nursing skills to succeed in the course, available on The Course Point Lippincott, ATI and Nursing Learning Center resources.
- Computer Assisted Instruction: Internet research, case study, including Lippincott Course Point and ATI.
- Skills demonstration: skills competencies are required for successful course completion
- Reading Assignments and Discussion: Related topics on Nursing Fundamentals and skills
- Group Activity: Presentations, research, case studies, Post Conference and simulation debriefing, Canvas discussions.
- Lab Activity: Assessment Skills; Nursing Fundamental Skills; Check-off demonstrations, simulation exercises.
- Lecture, CANVAS PowerPoint, facilitation & discussion, student presentations.
- Simulation/Case Study: Nursing skills validation, Assessment skills, Communication skills, Skills proficiency exam.
- You must have all reading materials, learning aids, and Lab supplies in order to achieve successful learning.

Out of Class Assignments: The Department of Education policy states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time and two (2) hours of out-of-class time per week over the span of a semester. WASC has adopted a similar requirement.

Out of class assignments may include reading assignments from required textbooks, writing assignments reflecting course objectives, care plans, concept maps, drug cards, essays or professional papers, and research. Video assignments reflect skills practice. Other possible outside assignments may include lectures or in-services offered by the local health facilities or healthcare providers.

Students will schedule at least 1 hour weekly of skills practice and review at the Nursing Learning Center (NLC) during the first 8 weeks of the semester. Your instructor may assign more if needed to improve student performance.

Simulations: Simulation exercises are provided in a safe learning environment where all students can interact within a structured scenario to prepare for real-life situations.

Clinical sites: Clinical sites may include convalescent, post-acute and adult day out centers. Assignments for clinical preparation include skills practice, demonstration, Assessment of client data, reviewing medication profiles, and completing pre- assignments as designated for each clinical area. Students working in clinical areas function within their legal proficiency and under direct observation of instructor and institutional nursing staff. HIPAA laws Must be observed and applied to all client care and clinical practices. Legal state and federal laws apply. Personal protective equipment (PPE) will be always worn in clinical areas as mandated by institutional guidelines.

Requirements: BLS training, immunizations, background checks, drug screening, vaccination, and specific hospital orientation, prior to attending clinical rotations (please see the student handbook for more information). A student will not be allowed to continue in the program if this is not completed. This will constitute a 'DROP' from the program.

What if I need to borrow technology or access to WIFI?

1. To request a loaner laptop, MYFI device, or other electronic device, please submit your request here: https://imperial.edu/students/student-equity-and-achievement/

Course Grading Based on Course Objectives

Students must maintain a grade "C" average of 78% or above to pass exams, assignments, and the course. Passing grade is determined by the scale below. Grades will not be "rounded up". To pass exams and even advance to the next semester, a "C" of 78% or better is required in this course.

GRADING:

A = 93-100%

B = 85-92%

C = 78-84%

D = 70-77%

F = Below 70% (D and F grades are considered failing grades)

All of the following must be attained to successfully pass this course:

- Students who fail a total of 4 exams during the course will be dropped from the program.
- > Students who fail to meet a total equivalent of 78% on the mid-term theory exam will be dropped from the program.
- Students who fail to meet a total equivalent of 78% on the FINAL exam be dropped from the program.
- > Students who accrue 3 unsatisfactory performances, whether in skills or clinical, will be dropped from the program.
- > Students must demonstrate safe and proficient clinical skills to pass the course. Students may be dropped from the program if their skills are not safe and proficient.
- Failure to pass a skills demonstration exam is deemed unsatisfactory. Students who accrue three (3) unsatisfactory grades in clinical practice or fail to meet the clinical objectives will result in failure of this class regardless of the overall grade.

Academic Honesty (Artificial Intelligence -AI)

IVC values critical thinking and communication skills and considers academic integrity essential to learning. Using AI tools as a replacement for your own thinking, writing, or quantitative reasoning goes against both our mission and academic honesty policy and will be considered academic dishonesty, or plagiarism unless you have been instructed to do so by your instructor. In case of any uncertainty regarding the ethical use of AI tools, students are encouraged to reach out to their instructors for clarification.

Academic honesty in the advancement of knowledge requires that all students and instructors respect the integrity of one another's work and recognize the importance of acknowledging and safeguarding intellectual property.

There are many different forms of academic dishonesty. The following kinds of honesty violations and their definitions are not meant to be exhaustive. Rather, they are intended to serve as examples of unacceptable academic conduct.

- Plagiarism is taking and presenting as one's own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to "cite a source" correctly, you must ask for help.
- Cheating is defined as fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.
- Falsification of records in the clinical settings is an extreme violation to the Nursing Practice Act and code of conduct. Falsifying medical records is a crime.
- > Obtaining and Unfair Advantage: stealing, reproducing, circulating or gaining access to examination material prior to the time authorized by the instructor. This includes destroying, defacing, unauthorized access, or concealing library materials for the purpose of depriving others of their use.
- > Students violating HIPAA confidentially guidelines will be disciplined up to immediate dismissal from the course. The law requires strict adherence to this law and breach of patient confidentiality is subject to civil penalties.

Anyone caught cheating or plagiarizing will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file.

Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to the General Catalog for more information on academic dishonesty or other misconduct.

Acts of cheating include, but are not limited to, the following:

- plagiarism; copying or attempting to copy from others during an examination or on an assignment.
- communicating test information with another person during an examination.
- allowing others to do an assignment or portion of an assignment.
- using a commercial term paper service.

Course Policies

ATTENDANCE

- A student who fails to attend the first meeting of a class or does not complete the first mandatory activity of an online class will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student's status will be the same as that of any other student who desires to add a class. It is the student's responsibility to drop or officially withdraw from the class. See General Catalog for details.
- ➤ Regular attendance in all classes is expected of all students. A student whose continuous, unexcused absences exceed the number of hours the class is scheduled to meet per week may be dropped. For online courses, students who fail to complete required activities for two consecutive weeks may be considered to have excessive absences and may be dropped.
- If a student leaves the class early, or after the break without notifying the instructor, this will constitute an absence equal to the number of hours absent that day.
- **Three tardies** are equivalent to an absence and will result in an unsatisfactory for the class.
- Absences attributed to the representation of the college at officially approved events (conferences, contests, and field trips) will be counted as 'excused' absences

CLASSROOM ETIQUETTE

- ➤ Electronic Devices: Cell phones and electronic devices must be turned off and put away during class, unless otherwise directed by the instructor. Electronic smart watches that can access the internet are not allowed in class during examinations.
- Food and Drinks are prohibited in all classrooms. Water bottles with lids/caps are the only exception. Additional restrictions will apply in labs. Please comply as directed by the instructor.
- Disruptive Students: Students who disrupt or interfere with a class may be sent out of the room and told to meet with the Campus Disciplinary Officer before returning to continue with coursework. Disciplinary procedures will be followed as outlined in the General Catalog.
- > Children in the classroom: Due to college rules and state laws, only students enrolled in the class may attend; children are not allowed.

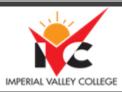

CIVILITY

Civility is treating others and us with respect, dignity and care. Civility is evident when we are sensitive to the impact that our communications and behaviors have on others, and when we acknowledge each other's self-worth and unique contributions to the community. Incivility includes all forms of disrespect or disregard for instruction, the instructor or a fellow student. Education Code Section 76034, IVC Code of Student Conduct

Other Course Information

Please see the nursing handbook on Remediation Policies

- 1. Students must remediate with nursing learning tutors before attempting to repeat a skills demonstration exam. In other words, if a student fails to demonstrate safe and proficient skills twice on any skills demonstrations (including the final exit proficiency demonstration), and does not pass after the third attempt, the student will be dropped from the program.
- 2. Students will demonstrate an exit proficiency skills evaluation by the end of the course. This is a PASS or FAIL skills exam.
- 3. Students must pass a passing clinical evaluation based on the overall clinical performance in the clinical sites. Evaluation includes observation from instructors, completion of care plans and client-related assignments, safe performances of skills and procedures, application of theory knowledge. Clinical Evaluations are continually done to assess that students meet "satisfactory," safe and proficient practices. Evaluation is based on adherence to nursing standards of care, QSEN competencies, care plan and written assignments. Professional behavior, performances and clinical attendance must be complied with. An unsatisfactory performance in the clinical practice area may be given for unprofessional conduct, "unsafe" practices, incomplete patient care assignments or any other clinical assignments, excessive absences, not adhering to clinical regulations. Students may be required to remediate before returning to the clinical setting.
- 4. Theory and skills/clinical course work must be concurrent; therefore, if the final grade in clinical is rated unsatisfactory or unsafe, the student will not be allowed to continue in the program.
- 5. **Students must pass a 25-question medication dosage calculation test with a 92%.** or greater on the first attempt.
 - A second chance is given to retake the calculation exam if a student does not pass it the first time. Students must pass the second calculation exam with 96%.
 - A third change is given to retake the calculation exam; students must pass with 100%.
 - Students will be dropped from the program if failure to pass the calculation exam on the three attempts. This score is not included in the course grade point average; it is a pass or fail assignment. **No calculators are allowed**
- 6. A "D" or "F" grade is "NOT PASSING." The final grade will reflect as a final "F"

- 7. Points will be deducted for late assignments: 10% for each day late; (3 days late means 30% deduction from score achieved) For assignments graded pass/fail or satisfactory/unsatisfactory, a "U" will be given for late work.
- 8. All written assignments will be typed in American Psychological Association (APA) format. Nursing programs and organizations use APA, not MLA
- 9. THERE WILL BE NO MAKE-UPS FOR TESTS, EXAMS OR QUIZZES MISSED DUE TO ABSENCES.
- 10. Students will take two proctored ATI exams: Nursing Fundamentals and Nutrition.
- 11. Timely attendance is required. Do not be late for clinical assignments. Instructor may reserve the right to send student home when it is more than one hour tardy.

Please see student catalog and handbook.

Accessibility Statement

Imperial Valley College is committed to providing an accessible learning experience for all students, regardless of course modality. Every effort has been made to ensure that this course complies with all state and federal accessibility regulations, including Section 508 of the Rehabilitation Act, the Americans with Disabilities Act (ADA), and Title 5 of the California Code of Regulations. However, if you encounter any content that is not accessible, please contact your instructor or the area dean for assistance. If you have specific accommodations through *DSPS*, contact them for additional assistance. We are here to support you and ensure that you have equal access to all course materials.

Financial Aid

Your Grades Matter! In order to continue to receive financial aid, you must meet the Satisfactory Academic Progress (SAP) requirement. Makings SAP means that you are maintaining a 2.0 GPA, you have successfully completed 67% of your coursework, and you will graduate on time. If you do not maintain SAP, you may lose your financial aid. If you have guestions, please contact financial aid at finaid@imperial.edu.

IVC Student Resources

IVC wants you to be successful in all aspects of your education. For help, resources, services, and an explanation of policies, visit http://www.imperial.edu/studentresources or click the heart icon in Canvas.

		1. Reading assignments to Complete:	supplies:
		Asepsis & Infection Control-	wound tray, abdominal pads,
		Taylor's Ch 25; Skills Ch. 1 Isolation	4X4 gauzes, irrigation tray,
Tuesday Skills/Lab		techniques: Contact, Droplet,	N.S, black ink pen
August 19, 2025	Faculty	Airborne and Reverse Isolation.	
0800-1300	Fitzsimmons	Standard and Transmission-based	Supplies:
	Kunath	Precautions: Taylor's p.683-686	Sterile gloves,
	Anderson	Case Study- John Willis: Skills book	masks, Gowns for
	Bravo	p.1104-1106	isolation, booties,
		Skin Integrity/Wound Care and Wound Massurement Taylor's	Sterile surgical
		Wound Measurement – Taylor's	gowns, Various
Lindated 6/2022		Ch 33; Skills Ch 8	wound dressings, tape,

			Pages/ Due
Date or Week	Location	Activity, Assignment, and/or Topic	Dates/Tests/Skills
		Heat & Cold application - Taylor's	ace wraps,
	Embedded	Ch 33, p.1192-1197	Kerlix, bandages binders,
	Tutors	2. Related Chapter & Activities to Complete:	and Slings. Model
	Van Zandt	Review Power Points	arms with staples
	Williams	Complete Study Guide Ch. 16-17, 19, 25,	& sutures,
		28, 31-34	wound irrigation trays,
		3. ATI Skills Modules ATI Engage Fundamentals	JP drain, hemovac drain.
		Infection Control Infection Control and	Decub models,K-pad Ice
		Isolation Surgical Asepsis	packs, heating pads
		ATI Video Case Studies Wound Care	
		Infection Control, Wound Evisceration	Class demo:
		Control & Wound Care	Wound
		Nursing Skills	assessment & wound care
		Skill 1-3 Using Personal Protective Equipment	
		Skill 1-4 Preparing a Sterile Field/	
		Packaged Sterile Drape	
		Skill 1-5 Preparing a Sterile	
		Field/Sterile Kit Tray	
		Skill 1-6 Adding Sterile Items to a Sterile Field	
		Skill 1-7 Putting on Sterile Gloves/ Removing	
		Skill 8-1 Preventing Pressure Ulcers	
		Skill 8-2 Cleaning a Wound, Applying a	
		Dry	
		Dressing (general guidelines)	
		Skill 8-3 Performing Irrigation of a Wound	
		Skill 8-4 Collecting a Wound Culture	
		Skill 8-5 Applying Montgomery Straps	
		Skill 8-6 Caring for a Penrose Drain	
		Skill 8-7 Caring for a T-Tube Drain	
		Skill 8-8 Caring for a Jackson-Pratt (JP) Drain	
		Skill 8-9 Caring for a Hemovac Drain	
		Skill 8-10 Applying Negative	
		Pressure	
		Wound Therapy	
		• Skill 8-11 Removing Sutures	
		Skill 8-12 Removing Surgical Staples	
		Skill 8-13 Applying an External Heating Pad	
		Skill 8-14 Applying a Warm Compress	
		Skill 8-15 Assisting with a Sitz Bath	
		Skill 8-16 Applying Cold Therapy	
		Skill 9-14 Applying a Sling	
		Skill 9-15 Applying Figure Eight Bandage	

			Pages/ Due
Date or Week	Location	Activity, Assignment, and/or Topic	Dates/Tests/Skills
		Skill 12-14 Caring for a Hemodialysis Access (AV fistula or graft) Applying a Saline- Moistened Dressing and a Hydrocolloid Dressing Student Expectations: Student should be able to demonstrate & identify the following: Hand hygiene, sterile gloving, Applying and removing PPE, Isolation techniques (contact, airborne, droplet & reverse isolation), wound care for open/closed wound and JP care, wound irrigation. Pressure ulcer prevention measures.	
Week 2 Thursday August 21, 2025 0800-1300	Faculty Fitzsimmons Kunath Anderson Bravo	WBL Activity 2- Simulated workplace: Preparing for clinical experience Continuing with Concepts of Infection Control and Wound Care	Students: Please bring your wound supplies: wound tray, abdominal pads, 4X4 gauzes, irrigation tray, N.S, black ink pen. Supplies: Same as Tuesday
	Embedded Tutors Van Zandt Williams		Class demo: Wound assessment & wound care
Week 2 Friday Skills/Lab August 22, 2025 0800-1300	Room 2131 Faculty Fitzsimmons Kunath Anderson Bravo	WBL Activity 2- Simulated workplace: Preparing for clinical experience #1 EXAM— Basic Nursing Care: Physical & Respiratory Assessment, VS, Hygiene, Patient transfer Calculation TEST #2 (2nd attempt) After Class Must pass the calculation exam to continue in the program Sims Lab: Skills Application & practice What to prepare for check-off demonstration: Must know how to perform a head-to-toe health/Skin assessment with respiratory assessment; V.S., oxygenation (O2, pulse oximetry); Wound Care	PRACTICE time Students, please bring your wound supplies May Start V.S .Check-off

Class Dates: 8/11/25-12/6/25

Holidays: 9/1, 11/10

Subject to change without prior notice

Course Unit Content & Objectives

1. Nursing Role and Scope of Practice

- A. Define nursing and relate its current state to historical events and nursing leaders.
- B. Compare and contrast the various roles of contemporary nurses today.
- C. Review the different educational paths to professional nursing and their implications for career mobility and advancement.
- D. Discuss the scope of practice of unlicensed personnel, licensed/vocational nurses, professional nurses, and advanced practice nurses.
- E. Describe how state nurse practice acts define the legal scope of nursing practice to protect patient's rights and reduce risk of nursing liability.
- F. Review an established code of ethics and its role in guiding nursing practice and ethical decision making.
- G. Recognize competencies related to knowledge, skills, and attitudes that nurses are expected to integrate into their practice.

2. Spectrum of Healthcare

- A. Differentiate between the terms health and illness and the impact that lifestyle and risk factors have on one's health status.
- B. Define the terms health promotion and wellness and discuss the nursing role in promoting the patient's health and wellness and disease prevention
- C. Differentiate between primary, secondary, and tertiary care as well as the role of the nurse when providing these levels of care.
- D. Differentiate between the goals of acute and chronic care and examples of patient conditions in each category.
- E. Discuss the principles of restorative or rehabilitative care, its goals, and the role of the nurse when working with patients undergoing rehabilitation.
- F. Compare and contrast palliative and hospice care and the role of the nurse in providing end of life care.
- G. Describe the various health care settings in which health care is delivered to patients of all ages.
- H. Discuss the roles of state and federal governments in regulating health care agencies

3. Profession Related Concepts/ Patient Centered Care

- A. Discuss the meaning of patient-centered care
- B. Describe concepts of holistic health and nursing.
- C. Describe the concept of caring as a foundation for nursing practice
- D. Review the professional skills inherent in providing patient-centered care

CONTENT TOPIC

The Nursing Process:

- A. Define the nursing process and discuss its use as a tool for identifying actual and potential patient problems and planning patient-centered care.
- B. Compare and contrast the various steps of the nursing process and the role of the nurse
- C. Discuss the purpose of a patient plan of care, its developmental process, its implementation, and role in determining attainment of patient outcomes.

Clinical Judgment:

- A. Define clinical judgment and its relationship to nursing practice
- B. Compare and contrast clinical judgment and critical thinking.
- C. Differentiate between decision making and problem solving.
- D. Discuss the significance of the scientific method for determining best nursing practice

Advocacy:

- A. Define advocacy and its relationship to nursing practice.
- B. Discuss the relationship between the nurse's role as advocate and the patient's right to information and make informed health care decisions.
- C. Review the Patient's Bill of Rights and the Self Determination Act and their association with the nurse's role as patient advocate.

Cultural Sensitivity:

- A. Define cultural sensitivity and its relationship to nursing practice.
- B. Discuss the term culture and the various components that contribute to its definition (ethnicity, spiritual beliefs, social practices).
- C. Compare and contrast the terms cultural sensitivity and cultural competence in relation to the role of the health care provider.
- D. Recognize the influence culture has on health, health practices, illness, and caring patterns.

Communication:

- A. Define communication and its relationship to nursing practice.
- B. Describe the four components of the communication process.
- C. Differentiate between verbal and nonverbal communication.
- D. Discuss characteristics of varied types of communication.
- E. Differentiate between non-therapeutic and therapeutic communication.
- F. Discuss the use of technology in the communication process.
- G. Describe how nursing documentation is a written form of communication.
- H. Identify potential barriers to effective communication.

4. Profession Related Concepts/ Interdisciplinary Collaboration

- A. Define the concept of interdisciplinary care.
- B. Describe the essential aspects of collaborative health care.
- C. Discuss the benefits of an interdisciplinary health care team providing client care.

5. Profession Related Concepts/ Evidence-Based Practice

- A. Define the concept of evidence-based practice
- B. Identify available resources for evidence-based nursing practice.
- C. Discuss how evidence-based practice provides optimum care for individuals and their families.

6. Profession Related Concepts/ Quality Improvement

- A. Define the concept of quality improvement.
- B. Discuss the role of the nurse in identifying patient concerns related to quality care.

7. Profession Related Concepts/ Safety

A. Define the concept of patient safety

- B. Discuss personal and environmental factors that impair a patient's ability to protect themselves from injury.
- C. Review interventions that can assist in reducing risk of patient injury (properly identifying patient, using ten rights of medication administration, performing fall risk assessment, communicating patient information to appropriate team member).
- D. Discuss how proper and effective use of technology and standardized policies and procedures support safe, quality care.
- E. Recognize the role of the nurse in monitoring their own care and that of others in promoting a safe environment for the patient.
- F. Review the National Patient Safety Goals developed by the Joint Commission and their relationship the development of national safety standards and accreditation of health care institutions.

8. Profession Related Concepts/ Informatics

- A. Define the concept of informatics
- B. Describe the use of computers in nursing education and practice.
- C. Discuss the computer skills and computer applications necessary for monitoring and documenting patient information.
- D. Observe use of appropriate search engines and databases to obtain evidence-based research when determining best practice.

9. Profession Related Concepts/ Patient Education

- A. Define the concept of patient education.
- B. Identify the role of the nurse in relation to patient education.
- C. Describe the three domains of learning.
- D. Review basic principles of learning.
- E. Discuss how to identify educational needs of patients.
- F. Describe the various elements of a teaching plan for patients

10. Profession Related Concepts/ Professionalism

- A. Define the concept of professionalism and its relationship to nursing practice.
- B. List professional behaviors that are consistent with those of a nurse.
- C. Discuss the relationship of ethical and legal practice to the role of nurses.
- D. Compare and contrast accountability and responsibility.

11. Profession Related Concepts/ Leadership

- A. Define the concept of leadership
- B. Identify the characteristics of effective leaders.
- C. Describe various leadership roles assumed by nurses.
- D. Discuss how nurses as leaders can influence provision of safe patient care.

12. Client Related Concepts/ Rest and Sleep

- A. Review the role played by rest and sleep in maintaining good physical and mental health.
- B. Discuss the effect that lack of sleep has on a patient's physical and mental health.
- C. Discuss developmental variations in sleep patterns.
- D. Describe the functions, physiology, and stages of sleep.
- E. Identify conditions that interfere with a patients' rest and sleep pattern.
- F. Recognize the characteristics of common sleep disorders.
- G. Review nursing interventions that can help improve a client's quality of rest and sleep.

13. Client Related Concepts/ Spirituality

A. Compare and contrast the concepts of spirituality and religion.

- B. Review the religious practices of selected religions and their relationship to health promotion and healthcare.
- C. Determine factors that contribute to spiritual distress and resulting manifestations. D. Review the nurses' role when caring for patients who are experiencing spiritual distress.

14. Patient Related Concepts/ Growth and Development

- A. Review selected theories of human development and their respective stages.
- B. Discuss the impact that successful and unsuccessful achievement of developmental tasks has on the ability of an individual to progress to a higher level of development.
- C. Ascertain the personal and environmental factors that can influence an individual's success in developmental tasks.
- D. Review indicators of successful and delayed task resolution.

15. Patient Related Concepts/ Sensory Perception

- A. Review the role played by sensory perception in maintaining good physical health.
- B. Describe the anatomical and physiological components of the sensory-perceptual process.
- C. Discuss factors that affect a patient's sensory perceptual processes.
- D. Identify conditions that interfere with patients' ability to process sensory input.
- E. Differentiate between sensory deficits, overload, and deprivation.
- F. Review nursing interventions that can facilitate or maintain a patient's sensory perceptual processes.

16. Patient Related Concepts/ Hygiene (includes Hygiene Skills Lab)

- A. Review the role played by the skin, mucous membranes, teeth, and nails in maintaining the body's first line of defense against pathogens.
- B. Describe conditions and activities that place patients at risk for altered skin integrity.
- C. Discuss hygienic practices that support healthy skin integrity.
- D. Discuss the effect that cultural practices and developmental stage has on hygiene practices.
- E. Determine a patient's need for assistance with hygiene-related care.
- F. Describe the procedures for providing hygiene-related care in a safe, comfortable environment.
- G. Demonstrate proper techniques that support patient hygiene.

CONTENT TOPIC

- A. Hygiene skills lab/ mouth, skin, hair, nail, foot and perineal care
- B. Hygiene skills lab/ baths and bed making

17. Patient Related Concepts/ Activity and Exercise (includes Mobility Skills Lab)

- A. Review the role played by the musculoskeletal and neurological systems in providing and regulating movement.
- B. Relate the effect exercise has on proper functioning of body systems and activity tolerance.
- C. Identify the elements of an exercise program that serves to maintain proper functioning and prevent lifestyle diseases.
- D. Discuss the effect lack of movement has on bones, muscles, and joints.
- E. Discuss the effect developmental stage has on bone, muscles, and joints.
- F. Demonstrate proper techniques that support patient mobility and prevent complications of immobility.

CONTENT TOPIC

Mobility skills lab:

- A. Walking with a crutch/cane/walker
- B. Wheelchair assembly/disassembly and use
- C. Patient positioning

- D. Pressure ulcer prevention measures and equipment
- E. Mobility skills lab/ range of motion

18. Patient Related Concepts/ Infection Control (includes Infection Control Skills Lab)

- A. Compare and contrast the various elements of the chain of infection.
- B. Review the anatomical and physiological barriers that protect an individual against infections.
- C. Describe the signs and symptoms of an inflammatory response, local and systemic infections, and related diagnostic tests.
- D. Discuss the etiology of nosocomial infections
- E. Differentiate between medical and surgical asepsis.
- F. Relate principles of asepsis and their application to patient care and wound care.
- G. Differentiate between standard precautions and various types of isolation precautions.
- H. Review nursing interventions that can protect a patient against infections.
- I. Demonstrate proper techniques that support infection control in patient care and wound care. \

CONTENT TOPIC

Infection control skills Lab:

- A. Hand hygiene and universal precautions
- B. Isolation precautions and application of personal protective equipment (PPE)
- C. Medical and surgical asepsis, surgical scrub, applying sterile gloves and surgical gowning
- D. Wound care:
 - wound cleansing and irrigation
 - suture and staple removal
 - · wraps and slings
 - cold/heat application

19. Patient Related Concepts/ Elimination (includes Urinary and Bowel Elimination Skills Lab)

- A. Review Bowel elimination skills: the role played by elimination in maintaining good physical health.
- B. Describe the process of urine and feces production and subsequent elimination patterns.
- C. Differentiate between normal and abnormal elimination patterns.
- D. Discuss developmental and other factors that affect a patient's elimination status.
- E. Identify conditions that interfere with patients' normal elimination patterns.
- F. Compare and contrast normal and abnormal characteristics of urine and feces.
- G. Identify diagnostic tests related to elimination and the nurse's role in obtaining specimens.
- H. Nursing interventions that can facilitate or maintain a patient's elimination patterns.
- I. Demonstrate proper techniques that support a patient's elimination needs.

CONTENT TOPIC

Bowel elimination skills Lab:

- A. Bedpans and urinals
- B. Collecting urine and stool specimens and documentation
- C. Catheter insertion and removal, specimen collection
- D. Enemas, specimen collection (hemoccult

20. Patient Related Concepts/ Nutrition (includes Nutrition Skills Lab)

A. Review the role played by nutrition in maintaining good physical health throughout the lifespan.

- B. Describe normal processes related to digestion, absorption, and metabolism of carbohydrates, proteins, and fats.
- C. Describe the role water, vitamins, minerals, and electrolytes play in supporting body functions and processes.
- D. Determine the significance of the balance between caloric intake and energy expenditure in relation to weight gain and loss.
- E. Discuss physical, psychological, developmental, cultural and religious factors that affect a patient's nutritional status.
- F. Identify norms for body weight and BMI based on established standards.
- G. Use guidelines based on the USDA Food Pyramid when determining dietary recommendations for patients.
- H. Differentiate between various alternative and therapeutic diets.
- I. Review nursing interventions that can assist patients in meeting their nutritional needs.
- J. Demonstrate proper techniques that support a patient's nutrition needs

CONTENT TOPIC

Nutrition skills lab:

- A. Tray setup and feeding, (NG tube and feeding tube insertion, Dobhob tube, feeding by gravity and pump, care and maintenance of G-tube)
- B. Special diets
- C. Intake and output

21. Patient Related Concepts/ Comfort/Pain (includes Comfort Skills Lab)

- A. Review the role played by pain, as a symptom of a health issue, and its impact on basic physiological needs.
- B. Review theories related to the physiology of pain.
- C. Discuss physical, psychological, developmental, and cultural factors that affect the perception and expression of pain.
- D. Differentiate between the various types and characteristics of pain.
- E. Determine a patient's need for pain relief using established subjective tools and objective data.
- F. Review pharmacologic and non-pharmacologic nursing interventions that can assist patients in managing their pain.
- G. Review alternative and complementary methods of pain relief that patients may consider (acupressure, acupuncture, biofeedback).
- H. Demonstrate proper techniques that support a patient's comfort needs.

SKILLS LAB:

- A. Application of heat and cold
- B. Pain rating scales

22. Patient Related Concepts/ Fluid and Electrolytes

- A. Recognize alterations in laboratory values of urine osmolarity, and serum sodium, potassium, chloride, calcium, and phosphorus.
- B. Recognize clinical manifestation of fluid imbalances and alterations in sodium, potassium, chloride, calcium, and phosphorus
- C. Apply knowledge of pathophysiology when planning care for patients with alterations in fluid balance
- D. Apply knowledge of pathophysiology when planning care for patients with alterations in sodium, potassium, chloride, calcium, and phosphorus.

E. Identify priority actions for patients with an alteration in fluid balance or sodium, potassium, chloride, calcium, and phosphorus.

23. Patient Related Concepts/ Oxygenation (includes Skills Lab)

- A. Recognize components of an assessment related to oxygenation that should be included data collection
- B. Apply knowledge of anatomy, physiology when assessing oxygenation and recognize variations in breathing patterns when caring for patients.
- C. Recognize clinical manifestation of respiratory imbalances in pulse oximetry and other laboratory values related to oxygenation.
- D. Discuss the correct use and functioning of therapeutic devices that support oxygenation.
- E. Describe the role of the nurse in providing quality care for patients who have an alteration in oxygenation.
- F. Identify health care education and safety needs for patients who have an alteration in oxygenation prevention of respiratory infections

CONTENT TOPIC

Skills Lab:

- A. Respiratory assessment, Comparing and contrasting breath sounds: Vesicular, Bronchovesicular, Bronchial
- B. Perform a complete respiratory assessment demonstrating techniques: inspection, palpation, percussion, auscultation, chest excursion, tactile fremitus, egophony, bronchophony and whispered pectoriloguy
- C. Deep breathing and coughing exercises, use of incentive spirometry and teaching patient's controlled diaphragmatic breathing
- D. Administration of oxygen therapy using appropriate respiratory devices: nasal cannula, oxygen mask, venturi mask, re-breathable and non-re-breathable mask
- E. Recognize alterations in respiratory laboratory values of oxygenation, ABG
- F. Introduction to administration of respiratory therapeutic modalities: Postural drainage, Sputum specimen, Oral suction, Nasopharyngeal suction

24. Patient Related Concepts/ Medication Administration (Includes Medication Skills Lab)

- A. Discuss the role of the nurse in safely and legally administering medications to patients.
- B. Discuss factors that can increase the risk of making a medication error.
- C. Identify the six rights of medication administration.
- D. Determine the various routes by which medication can be administered.
- E. Perform basic apothecary to metric conversions and drug calculations.
- F. Discuss the role of the nurse related to educating patients about their medications.
- G. Demonstrate proper techniques that support safe medication administration

CONTENT TOPIC

Medication administration skills lab:

- A. Oral by nasal, ear, eye, rectal, topical, inhaled and vaginal medications, sublingual, injections: subcutaneous, dermal and intramuscular, and gastric tube
- B. Proper medication preparation using six rights
- C. Basic drug calculation
- D. Medication administration charting

25. Patient Related Concepts/ Documentation (includes Documentation Skills Lab)

- A. Describe the significance of nursing documentation as a written form of communication.
- B. Discuss the use of technology in the communication process.
- C. Identify the purpose and various elements of the patient record.

- D. Review the legal parameters that guide documentation and the maintenance of patient records.
- E. Review proper guidelines for effective documentation.
- F. Apply principles of effective documentation to an actual or simulated patient record. G. Demonstrate proper documentation techniques that support accurate, thorough, and timely charting.

CONTENT TOPIC

Documentation skills lab:

- A. Subjective and objective data
- B. Narrative charting
- C. Flow sheets and trending records
- D. Computer information systems and computerized records

26. Patient Related Concepts/ Body Mechanics and Ergonomics (includes Body Mechanics Skills Lab)

- A. Review principles of good body mechanics and ergonomics when positioning, moving, lifting, and ambulating patients.
- B. Identify assistive devices that can be used when moving patients to aid in the prevention of injury.
- C. Examine the relationship between using good body mechanics and preventing injuries.
- D. Discuss appropriate interventions to take to minimize injury to patient and self during a patient's fall.
- E. Demonstrate proper body mechanics and ergonomics when positioning, moving, lifting and ambulating patients.

CONTENT TOPIC

Body mechanics skills lab:

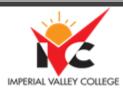

- A. Turning patient, moving patient up in bed, and use of draw sheet
- B. Gait belts
- C. Patient transfers

27. Patient Related Concepts/ Nursing Process (Includes Nursing Process Lab)

- A. Identify the steps of the nursing process.
- B. Review the use of the nursing process as a tool for planning patient care.
- C. Differentiate between subjective and objective data and various data collection methods.
- D. Review the NANDA list of nursing diagnoses and their use in describing potential and actual patient problems.
- E. Apply principles of the nursing process to an actual or simulated patient record.

CLINICAL OBJECTIVES

- 1. Utilize the nursing process as a framework for planning nursing care:
 - A. Practice assessment skills using proper techniques and safety measures.
 - B. Practice basic nursing skills using proper techniques and safety measures.

- C. Use the steps of the nursing process when developing a plan of care
 - Include cultural and age-appropriate interventions in the plan of care.
- 2. Use scientific principles and evidence-based literature when planning care:
 - A. Use appropriate resources when selecting interventions for the plan of care
 - B. Base rationales for interventions on scientific principles.
- 3. Recognize the professional and legal responsibilities of nursing practice:
 - A. Identify skills that are within the RN's scope of practice.
 - B. Identify legal parameters that govern nursing practice
