

Thank you for choosing IVC! We are so happy to join you on your educational journey.

Basic Course Information

Semester:	Winter 2026	Instructor Name:	Mardjan Shokoufi
Course Title & #:	STAT C1000 Elementary Statistics	Email:	mardjan.shokoufi@imperial.edu
CRN #:	15278	Webpage	None
Classroom:	None- Online	Office #:	2762
Class Dates:	Jan 5- Feb 4, 2026	Office Hours:	No set office hours for winter session. Email me if you would like to set up an appointment to meet over zoom (zoom meeting code on canvas homepage for the course).
Class Days:	None- Fully online class We can meet by appointment via zoom. E-mail me if you are interested in setting an appointment time.	Office Phone #:	(760)355-6401 NOTE: for Winter session, I will not be physically in my office, so it is best to email me.
Class Times:	None- Online	Emergency Contact:	Division secretary: Ms. Silvia Murray silvia.murray@imperial.edu
Units:	4	Class Format:	Fully Online, Asynchronous

Course Description

This course is an introduction to statistical thinking and processes, including methods and concepts for discovery and decision-making using data. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-squared, and t-tests; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings. Students apply methods and processes to applications using data from a broad range of disciplines. (Formerly MATH 119)(C-ID: MATH 110) (CSU, UC credit limited. See a counselor.)

Additional Description Information:

The use of probability techniques, hypothesis testing, and predictive techniques to facilitate decision-making. Probability Theory, such as counting principles, conditional probability and the Poisson distribution. Applications using data from disciplines including business, social sciences, psychology, life science, health science, and education.

Course Prerequisite(s) and/or Corequisite(s)

Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra.

Student Learning Outcomes

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

1. Demonstrate problem solving strategies by identifying an appropriate method to solve a given problem, correctly set up the problem, perform the appropriate analysis and computation, and share their interpretation of the conclusion or the outcome, using correct grammar or in an oral presentation. This outcome will be assessed through selected exercises on exams throughout the semester. (ILO1, ILO2)

Course Objectives

Upon satisfactory completion of the course, students will be able to:

1. Assess how data were collected and recognize how data collection affects what conclusions can be drawn from the data.
2. Identify appropriate graphs and summary statistics for variables and relationships between them and correctly interpret information from graphs and summary statistics.
3. Describe and apply probability concepts and distributions.
4. Demonstrate an understanding of, and ability to use, basic ideas of statistical processes, including hypothesis tests and confidence interval estimation.
5. Identify appropriate statistical techniques and use technology-based statistical analysis to describe, interpret, and communicate results.
6. Evaluate ethical issues in statistical practice.
7. ADDITIONAL Objective Information:
8. Distinguish among different scales of measurement and their implications.
9. Calculate measures of central tendency and variation for a given data set.
10. Determine and interpret levels of statistical significance including p-values.
11. Identify the basic concept of hypothesis testing including Type I and II errors.
12. Formulate hypothesis tests involving samples from one and two populations.
13. Use linear regression and ANOVA analysis for estimation and inference and interpret the associated statistics.
14. Make use of Chi-square distributions to analyze counts.
15. Use appropriate statistical techniques to analyze and interpret applications based on data from disciplines including business, social sciences, psychology, life science, health science, and education.
16. Apply concepts of probability theory, such as counting principles, conditional probability and the Poisson distribution.

Textbooks & Other Resources or Links

You **need to purchase** 18 weeks access to ACCESS Pearson MyMathLab. **Do not buy a physical textbook.**

The Access Pearson **MyMathLab registration handbook** is in the syllabus section of canvas.

No need to purchase physical textbook as it is imbedded in the MyMathLab.

Textbook: Elementary Statistics Using Excel by M. Triola, 7th edition, 2022; ISBN: 9780136961888

IMPERIAL VALLEY COLLEGE

We will be using MyMathLab component that has e-book, so no need to buy the actual book.

MyMathLab needs to be purchased. Use information posted on canvas on how to register and to purchase access.

We will be using MyMathLab component for assignments, and some tests.

Follow the steps in “How to Register on MyMathLab” document posted on canvas shell for this course.

Note: you get 7 days of free access, so my expectation is you will be on MyMathLab from day 1 of the class.

Your success in the class depends on your readiness from day one to study and keep up with the assignments.

Your first assignment on MyMathLab is due on Friday 1/9 at noon.

All module 1 assignments need to be turned in on time, otherwise per IVC policy students must be dropped.

Course Requirements and Instructional Methods

Material needed: PC computer, MyMathLab course, access to EXCEL and XLSTAT, scanner, or camera to upload your work, paper, pen, pencil, highlighter, stapler, scientific calculator (you may download a free calculator app from various sites)

Note: Full laptop or desktop computer. Chromebooks, tablets, phones, and iPads are incompatible with the XLSTAT software used for this course.

Course setting:

We will cover chapters 1-12. The course is set as 8 parts (8 modules). See the attached calendar for all due dates and times.

This course is designed to have you learn facts while gaining an appreciation of the power of Statistics and getting ready for your future courses understanding of statistics. My responsibility is to do my best to be an effective guide, while you are responsible to make a commitment to learning and keeping up with the daily work.

Remember mathematics is learned through active participation.

Daily you will have to take notes based on lecture videos posted, read your e-book emphasizing the formulas and examples stated in the book notes document on canvas. And work on your assignment on mymathlab and discussion on canvas.

On daily basis you need to:

- Use provided lectures and book to study the day's topics and take notes.
- Work on the assignments.
- Know the pre-requisite topics learned in previous courses such as finding common denominator and such or ask me or tutors for help.

Out of Class Assignments: The Department of Education policy states that one (1) credit hour is the amount of student work that reasonably approximates not less than one hour of class time and two (2) hours of out-of-class time per week over the span of a 16-week semester. WASC has adopted a similar requirement.

For this class that means approximately 30 hours of studying, working on assignments and reviewing for the tests per week as this is a 5-week class.

EXCEL and XLSTAT

You **need** to have access to Microsoft Excel and XLSTAT

You have various options to access Excel:

- IVC's computer lab have Excel installed
- Your own computer may have Excel installed
- Login to your IVC email to access Excel remotely via outlook
here is how: <https://www.youtube.com/watch?v=gl08yqWU5mQ>
- XLSTAT is an extension of Excel that you need to access remotely or using one of IVC's computer labs.

Here is how to access it:

<https://www.youtube.com/watch?app=desktop&v=FF4S5slDbjo&feature=youtu.be>

Here is the XLSTAT code to enter: (copy and paste when need it)

XLSTAT activation code:

TE4DHT-ZRRP2X-ZJ3XB0-1A9KFN-KVNMSV-6GBZ6S

Course Grading Based on Course Objectives

First mandatory assignment is Video Introduction Due WED Jan 7

8 Classwork/Homework sets* @25 points each	175 (See the attached calendar for dates)
9 Discussions on canvas **@ 25 points each	200 (See the attached calendar for dates)
7 EXCEL projects** @ 50 points each	300(See the attached calendar for dates)
2 Tests @100 points each	200 (See the attached calendar for dates)
Cumulative Final @ 125 points	125 (See the attached calendar for date)
TOTAL	1000

*Each set would consist of 50-75 exercises, depending on the material.

One HW, one discussion and one Excel project will count as extra credit. **If you complete all assignments then one in each category of HW, Discussion and Excel project will count as extra credit.

Note: For discussion and Excel projects your first post (submission) will be graded only. So, make sure before you post you have looked at the file you are uploading and the answers you are posting. A meaningful reply to another student is required for full credit.

Grading Scale: The standard grading scale will be used: 90%=A, 80%= B, 70%-C, 60%=D, less than 60% will result in the grade of F.

900-1000 points = A
800-899 points = B
700-799 points = C
600-699 points = D
0-599 points = F

Extra Credit: 1 HW, 1 Excel project and 1 discussion will count as extra credit if all are turned in.

Course Policies

Class Rules:

1. Late assignments are only accepted for certain modules up to the specific deadline stated. See the schedule for more info.
2. No make-up test will be given. If one test is missed the percentage of final will replace that one missed test. If a student misses both tests, then only for one test the final percentage will be replaced and the other will be scored as zero.
3. There is no make-up for the Final exam.
5. Have paper, a notebook, pen, pencil, and highlighter, your fully charged computer ready during study time.
6. It is the student's responsibility to drop or officially withdraw from the class.
(See IVC class schedule for dates).
7. It is your responsibility to take notes and be aware of deadlines and due dates and times.

Academic Honesty (Artificial Intelligence -AI)

IVC values critical thinking and communication skills and considers academic integrity essential to learning. Using AI tools as a replacement for your own thinking, writing, or quantitative reasoning goes against both our mission and academic honesty policy and will be considered academic dishonesty, or plagiarism unless you have been instructed to do so by your instructor. In case of any uncertainty regarding the ethical use of AI tools, students are encouraged to reach out to their instructors for clarification.

Accessibility Statement

Imperial Valley College is committed to providing an accessible learning experience for all students, regardless of course modality. Every effort has been made to ensure that this course complies with all state and federal accessibility regulations, including Section 508 of the Rehabilitation Act, the Americans with Disabilities Act (ADA), and Title 5 of the California Code of Regulations. However, if you encounter any content that is not accessible, please contact your instructor or the area dean for assistance. If you have specific accommodations through **DSPS**, contact them for additional assistance.

We are here to support you and ensure that you have equal access to all course materials.

Academic Honesty including using Artificial Intelligence -AI

IVC values critical thinking and communication skills and considers academic integrity essential to learning.

- Using AI tools as a replacement for your own thinking, writing, or quantitative reasoning goes against both our mission and academic honesty policy and will be considered academic dishonesty, or plagiarism unless you have been instructed to do so by your instructor. In case of any uncertainty regarding the ethical use of AI tools, students are encouraged to reach out to their instructors for clarification.

- **Academic honesty** in the advancement of knowledge requires that all students and instructors **respect the integrity of one another's work and recognize the importance of acknowledging and safeguarding intellectual property**. There are many different forms of academic dishonesty. The following kinds of honesty violations and their definitions are not meant to be exhaustive. Rather, they are intended to serve as examples of unacceptable academic conduct.
- **Plagiarism** is taking and presenting as one's own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to cite a source correctly, you must ask for help.
- **Cheating** is defined as fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question. Anyone caught cheating or plagiarizing will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to IVC General Catalog for more information on academic dishonesty or other misconduct. Acts of cheating include, but are not limited to, the following:
 - plagiarism
 - copying or attempting to copy from others during an examination or on an assignment.
 - communicating test information with another person during an examination
 - allowing others to do an assignment or portion of an assignment.
 - using a commercial term paper service.
 - Using AI to help you with assignments including tests.

Attendance Policy

- **Attendance:** A student who fails to attend the first meeting of a class or does not complete the first mandatory activity of an online class will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student's status will be the same as that of any other student who desires to add a class. It is the student's responsibility to drop or officially withdraw from the class. See IVC General Catalog for details.
- Regular attendance in all classes is expected of all students. A student whose continuous, unexcused absences exceed the number of hours the class is scheduled to meet per week may be dropped. **For online courses, students who fail to complete required activities for two consecutive modules may be considered to have excessive absences and may be dropped.**

IVC Student Resources

IVC wants you to be successful in all aspects of your education. For help, resources, services, and an explanation of policies, visit <http://www.imperial.edu/studentresources> or click the heart icon in Canvas.

Anticipated Class Schedule/Calendar

Module		
Chapter	Assignments and Due Dates	Notes
Dates		
	Video introduction due Wednesday 1/7 at 10 pm	
	Discussion 1 part 1 original post due on Thursday 1/8 at noon	
Module 1	Discussion 1 part 1 reply to another student due Thursday 1/8 at 10 pm	If assignments are not turned in by due date and time then student will be dropped
Chapters 1 & 2	Discussion 1 part 2 original post due on Friday 1/9 at noon	
Jan 5-Jan 9	Discussion 1 part 2 reply to another student due Friday 1/9 at 10 pm	
	HW 1 due Friday 1/9 at noon	
	Excel Project 1 due Friday 1/9 at 10 pm	
	Discussion 2 original post due on Tuesday 1/13 at noon	
Module 2	Discussion 2 reply to another student due Tuesday 1/13 at 10 pm	No late assignments are accepted
Chapter 3	HW 2 due Tuesday 1/13 at noon	
Jan 9-Jan 13	Excel Project 2 due Tuesday 1/13 at 10 pm	
	Discussion 3 original post due on Friday 1/16 at noon	
Module 3	Discussion 3 reply to another student due Friday 1/16 at 10 pm	Late assignments are accepted till Monday 1/19 at noon
Chapter 4	HW 3 due Friday 1/16 at noon	
Jan 13- Jan 16	Excel Project 3 due Friday 1/16 at 10 pm	
	Test 1 open from Thursday 1/15 at 8 am till Saturday 1/17 at 10 pm	
	Discussion 4 original post due on Wednesday 1/21 at noon	
Module 4	Discussion 4 reply to another student due Wednesday 1/21 at 10 pm	Late assignments are accepted till Thursday 1/22 at noon
Chapter 5	HW 4 due Wednesday 1/21 at noon	
Jan 16- Jan 21	Excel Project 4 due Wednesday 1/21 at 10 pm	
	Discussion 5 original post due on Friday 1/23 at noon	
Module 5	Discussion 5 reply to another student due Friday 1/23 at 10 pm	Late assignments are accepted till Sunday 1/25 at noon
Chapter 6	HW 5 due Friday 1/23 at noon	
Jan 21-Jan 23	Excel Project 5 due Friday 1/23 at 10 pm	
	Discussion 6 original post due on Wednesday 1/28 at noon	
Module 6	Discussion 6 reply to another student due Wednesday 1/28 at 10 pm	Late assignments are accepted till Friday 1/30 at noon
Chapter 7	HW 6 due Wednesday 1/28 at noon	
Jan 23-Jan 28	Excel Project 6 due Wednesday 1/28 at 10 pm	
	Test 2 open from Monday 1/26 at 8 am till Wednesday 1/28 at 10 pm	

	Discussion 7 original post due on Friday 1/30 at noon	Late assignments are accepted till Saturday 1/31 at noon
Module 7	Discussion 7 reply to another student due Friday 1/30 at 10 pm	
Chapter 8	HW 7 due Friday 1/30 at noon	
Jan 28-Jan 30	Excel Project 7 due Friday 1/30 at 10 pm	
	Discussion 8 original post due on Tuesday 2/3 at noon	No late assignments are accepted
Module 8	Discussion 8 reply to another student due Tuesday 2/3 at 10 pm	
Chapters 9-12	HW 8 due Wednesday 2/4 at noon	
Jan 30-Feb 4	Final open from Sunday 2/1 at 8 am till Wednesday 2/4 at noon	

*****Tentative, subject to change without prior notice*****

Zoom meeting etiquettes: *Since we possibly will be meeting online for appointments times, then make sure you have a space free of distraction during our meeting times, have your computer charged or charging, have your notebook, pen, pencils, and calculator handy.*

1) Be RESPECTFUL

- a. Your written, verbal, and non-verbal communications should be respectful and focused on the learning topics of the class.

2) Find a QUIET LOCATION & SILENCE YOUR PHONE (if zooming)

- a. People walking around and pets barking can be a distraction.

3) EAT AT A DIFFERENT TIME.

- a. Crunching food or chugging drinks is distracting for others.
- b. Synchronous zoom times are set in advance so reserve meals for outside class meetings.

4) ADJUST YOUR LIGHTING SO THAT OTHERS CAN SEE YOU

- a. It is hard to see you in dim lighting so find a location with light.
- b. If your back is to a bright window, you will be what is called “backlit” and not only is it hard on the eyes (glare), but you look like a silhouette.

5) POSITION THE CAMERA SO THAT YOUR FACE AND EYES ARE SHOWING

- a. If you are using the camera, show your face; it helps others see your non-verbal cues.
- b. You may be at home but meeting in pajamas or shirtless is not appropriate so dress suitably. Comb your hair, brush your teeth, fix your clothes, etc. before your meeting time to show self-respect and respect for others.

6) Be READY TO LEARN AND PAY ATTENTION

- a. Catch up on other emails or other work later.
- b. If you are Zooming, silence your phone and put it away.
- c. If you are in a room with a TV – turn it off.

7) USE YOUR MUTE BUTTON WHEN IN LOUD PLACES OR FOR DISTRACTIONS

- a. Pets barking, children crying, sneezing, coughing, etc. can happen unexpectedly. It’s best if you conference in a private space, but if you can’t find a quiet place, when noises arise **MUTE** your laptop.

8) REMEMBER TO UNMUTE WHEN SPEAKING

- a. Follow your instructor’s directions about using the “**raise hand**” icon or chat function to be recognized and to speak, but make sure you have unmuted your device.
- b. Do not speak when someone else is speaking.

9) REMAIN FOCUSED AND PARTICIPATE IN THE MEETING

- a. Especially when the camera is on YOU, we can all see your actions. Engage in the meeting. Look at the camera. Listen to instructions. Answer questions when asked.
- b. Do not use the Zoom meeting to meet with your peers or put on a “show” for them.

10) PAUSE YOUR VIDEO IF MOVING OR DOING SOMETHING DISTRACTING

Emergencies happen. If you need to leave the room or get up and move about, stop your video.
