

Basic Course Information

Semester:	Winter 2026	Instructor Name:	Dr. Alejandro Cozzani
Course Title & #:	STAT C1000: Introduction to Statistics	Email:	alex.cozzani@imperial.edu
CRN #:	15281	Webpage (optional):	Refer to Canvas
Classroom:	N/A	Office #:	2776
Class Dates:	Class Start Date: January 05, 2026, Class End Date: February 04, 2026, Last Day to Add: 01/07/26 Deadline to Drop with "W": 01/27/26	Office Hours:	None
Class Days:	-----	Office Phone #:	760-355-5760
Class Times:	-----	Emergency Contact:	Silvia Murray 760-355-6201
Units:	4.0	Class Format/Modality:	Online Asynchronous

Course Description

This course is an introduction to statistical thinking and processes, including methods and concepts for discovery and decision-making using data. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-squared, and t-tests; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings. Students apply methods and processes to applications using data from a broad range of disciplines. (Formerly MATH 119) (C-ID: MATH 110) (CSU, UC credit limited. See a counselor.)

Additional Description Information:

The use of probability techniques, hypothesis testing, and predictive techniques to facilitate decision-making. Probability Theory, such as counting principles, conditional probability and the Poisson distribution. Applications using data from disciplines including business, social sciences, psychology, life science, health science, and education.

Course Prerequisite(s) and/or Corequisite(s)

Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra.

Student Learning Outcomes

Upon course completion, the successful student will have acquired new skills, knowledge, and or attitudes as demonstrated by being able to:

1. Demonstrate problem solving strategies by identifying an appropriate method to solve a given problem, correctly set up the problem, perform the appropriate analysis and computation, and share their interpretation of the conclusion or the outcome, using correct grammar or in an oral presentation. This outcome will be assessed through selected exercises on exams throughout the semester.

Course Objectives

Upon satisfactory completion of the course, students will be able to:

1. Assess how data were collected and recognize how data collection affects what conclusions can be drawn from the data.
2. Identify appropriate graphs and summary statistics for variables and relationships between them and correctly interpret information from graphs and summary statistics.
3. Describe and apply probability concepts and distributions.
4. Demonstrate an understanding of, and ability to use, basic ideas of statistical processes, including hypothesis tests and confidence interval estimation.
5. Identify appropriate statistical techniques and use technology-based statistical analysis to describe, interpret, and communicate results.
6. Evaluate ethical issues in statistical practice.
7. ADDITIONAL Objective Information:
8. Distinguish among different scales of measurement and their implications.
9. Calculate measures of central tendency and variation for a given data set.
10. Determine and interpret levels of statistical significance including p-values.
11. Identify the basic concept of hypothesis testing including Type I and II errors.
12. Formulate hypothesis tests involving samples from one and two populations.
13. Use linear regression and ANOVA analysis for estimation and inference and interpret the associated statistics.
14. Make use of Chi-square distributions to analyze counts.
15. Use appropriate statistical techniques to analyze and interpret applications based on data from disciplines including business, social sciences, psychology, life science, health science, and education.
16. Apply concepts of probability theory, such as counting principles, conditional probability and the Poisson distribution.

Textbooks & Other Resources or Links

Required:

1. Mario F. Triola. *Elementary Statistics using Excel* (7th Edition). Pearson. ISBN: 9780136921721 OR: e-Text ISBN-13: 9780137376940.

Other:

2. Software as needed: Primarily Microsoft Excel; XLSTAT, StatDisk Online, and/or Graphing Calculator (Be sure to check the Canvas announcement for specific details and the access code).

Course Requirements and Instructional Methods

1. Your Success Starts Here!

Success is the goal—and you’ve got what it takes! Stay focused, work hard, aim high, and always give it your best effort. You've got this!

2. Time Commitment: What to Expect Outside of Class

According to the Department of Education, for every 1 hour of class time, you should plan on spending about **2 additional hours** working outside of class each week. This helps you stay on top of things and truly understand the material. (WASC follows the same guidelines.)

3. Tech Checklist: What You’ll Need for Canvas

To access assignments and complete your work online, make sure you have:

-  A computer
-  Reliable internet access (If needed, you can use internet at IVC or your local library)
-  A compatible browser (Google Chrome or Firefox work best; Safari might not show everything correctly)

4. Assignment Deadlines: Stay Ahead!

Each module is open for a full week, giving you plenty of time to complete the assignments.

Tips to stay on track:

-  Don’t wait until the last minute—technical issues can happen, and assignments are due **before 11:59 PM on Sunday**.
-  Submit everything **directly in Canvas**—no emailed assignments will be accepted or graded.

5. Lecture Materials: Watch + Read = Succeed

You’re expected to go through each module’s readings (or textbook chapters) **and** watch the pre-recorded videos. The assignments are based on these materials, so make sure to stay up to date!

6. Online Discussions: Speak Up, Join In!

You’ll participate in discussion boards where you’ll analyze ideas, back up your thoughts with evidence, and engage with your classmates. It’s all about learning together!

7. Online Quizzes: Check Your Learning

Each module ends with a quiz to help you see how much you've learned.

 Instructions will be under the “Quizzes” tab in Canvas.

8. Assignments: Practice Makes Progress

Every module has a few assignments designed to help you dig deeper and master the key concepts. Take them seriously—they're here to help you learn.

9. Projects: Put Your Skills to the Test

Some modules include special projects to build your skills in **analyzing and interpreting data**. These are a great way to apply what you've learned in a hands-on way.

10. Tests and Exams: Be Ready for Anything

Expect a mix of question types:

- ✓ True/False
- ✓ Multiple Choice
- ✓ Open-Ended
- ✓ Free Response

11. Final Exam: Show What You Know

The final may include questions from earlier tests (recycled) and some new ones. They'll be similar in difficulty to what you've already seen—so if you've been keeping up, you'll do just fine!

12. Missed an Exam or Assignment?

If something serious comes up (like a hospital stay), you may request a makeup.

 Email your instructor as soon as possible and provide valid documentation. Without that, makeup requests can't be approved.

Course Grading Based on Course Objectives

How Your Grade Will Be Calculated

Your final grade will be based on **categories**, not just total points. Here's how each part of the class contributes to your overall grade:

CATEGORY	PERCENTAGE
Quizzes & Discussions	20%
Assignments	20%
Projects	20%
Exams (3 total)	20%
Final Exam	20%
Total	100%

Grading Scale

Grade	Percentage
A	90–100%
B	80–89.99%
C	70–79.99%
D	60–69.99%
F	59.99% and below

- Your current grade is always visible in **Canvas**.
- You must earn at least a **C (70%)** to pass the course.
- Final grades **will not be rounded** (e.g., 89.99% is still a B), so aim for a strong finish and stay consistent!

Academic Honesty (Artificial Intelligence -AI)

IVC values critical thinking and communication skills and considers academic integrity essential to learning. Using AI tools as a replacement for your own thinking, writing, or quantitative reasoning goes against both our mission and academic honesty policy and will be considered academic dishonesty, or plagiarism unless you have been instructed to do so by your instructor. In case of any uncertainty regarding the ethical use of AI tools, students are encouraged to reach out to their instructors for clarification.

Allowable Uses of AI:

You are encouraged to use AI tools for the following scholarly purposes:

- Research Assistance: You may use AI to help search academic databases, summarize scholarly articles, or find references for your projects. AI-generated summaries must be cited properly.
- Interactive Study Tools: AI can be used to aid your learning and study processes.

Prohibited Uses of AI:

To maintain academic honesty, the following uses of AI are not allowed:

- Submitting AI-generated essays, reports, or assignments as your own work.
- Using AI to complete exams or quizzes.
- Using AI to write discussion posts or responses automatically.

Transparency and Attribution Required:

If you use AI in your work, you must:

- Acknowledge and cite any AI-generated content.
- Disclose your use of AI tools in your writing or research, when permitted.

Let's use these tools responsibly while upholding the highest standards of academic integrity.

Accessibility Statement

Imperial Valley College is committed to providing an accessible learning experience for all students, regardless of course modality. Every effort has been made to ensure that this course complies with all state and federal accessibility regulations, including Section 508 of the Rehabilitation Act, the Americans with Disabilities Act (ADA), and Title 5 of the California Code of Regulations. However, if you encounter any content that is not accessible, please contact your instructor or the area dean for assistance. If you have specific accommodations through **DSPS**, contact them for additional assistance.

We are here to support you and ensure that you have equal access to all course materials.

Course Policies

ATTENDANCE

- A student who fails to attend the first meeting of a class or does not complete the first mandatory activity of an online class will be dropped by the instructor as of the first official meeting of that class. Should readmission be desired, the student's status will be the same as that of any other student who desires to add a class. It is the student's responsibility to drop or officially withdraw from the class. See [General Catalog](#) for details.
- Regular attendance in all classes is expected of all students. A student whose continuous, unexcused absence exceed the number of hours the class is scheduled to meet per week may be dropped. For online courses, students who fail to complete required activities for two consecutive weeks may be considered to have excessive absences and may be dropped.
- Absences attributed to the representation of the college at officially approved events (conferences, contests, and field trips) will be counted as 'excused' absences.

CLASSROOM ETIQUETTE

- Electronic Devices: Cell phones and electronic devices must be turned off and put away during class, unless otherwise directed by the instructor.

- Food and Drink are prohibited in all classrooms. Water bottles with lids/caps are the only exception. Additional restrictions will apply in labs. Please comply as directed by the instructor.
- Disruptive Students: Students who disrupt or interfere with a class may be sent out of the room and told to meet with the Campus Disciplinary Officer before returning to continue with coursework. Disciplinary procedures will be followed as outlined in the [General Catalog](#).
- Children in the classroom: Due to college rules and state laws, no one who is not enrolled in the class may attend, including children.

ONLINE NETIQUETTE

- What is netiquette? Netiquette is internet manners, online etiquette, and digital etiquette all rolled into one word. Basically, netiquette is a set of rules for behaving properly online.
- Students are to comply with the following rules of netiquette: (1) identify yourself, (2) include a subject line, (3) avoid sarcasm, (4) respect others' opinions and privacy, (5) acknowledge and return messages promptly, (6) copy with caution, (7) do not spam or junk mail, (8) be concise, (9) use appropriate language, (10) use appropriate emoticons (emotional icons) to help convey meaning, and (11) use appropriate intensifiers to help convey meaning [do not use ALL CAPS or multiple exclamation marks (!!!!)].

ACADEMIC HONESTY

Academic honesty in the advancement of knowledge requires that all students and instructors respect the integrity of one another's work and recognize the importance of acknowledging and safeguarding intellectual property.

There are many different forms of academic dishonesty. The following kinds of honesty violations and their definitions are not meant to be exhaustive. Rather, they are intended to serve as examples of unacceptable academic conduct.

PLAGIARISM

- Plagiarism is taking and presenting as one's own the writings or ideas of others, without citing the source. You should understand the concept of plagiarism and keep it in mind when taking exams and preparing written materials. If you do not understand how to "cite a source" correctly, you must ask for help.
- Cheating is defined as fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.

Anyone caught cheating or plagiarizing will receive a zero (0) on the exam or assignment, and the instructor may report the incident to the Campus Disciplinary Officer, who may place related documentation in a file. Repeated acts of cheating may result in an F in the course and/or disciplinary action. Please refer to the [General Catalog](#) for more information on academic dishonesty or other misconduct. Acts of cheating include, but are not limited to, the following: (a) plagiarism; (b) copying or attempting to copy from others during an examination or on an assignment; (c) communicating test information with another person during an examination; (d) allowing others to do an assignment or portion of an assignment; (e) using a commercial term paper service.

Other Course Information

Imperial Valley College offers various services in support of student success. The following are some of the services available for students. Please speak to your instructor about additional services which may be available.

- **CANVAS LMS.** Canvas is Imperial Valley College's main Learning Management System. To log onto Canvas, use this link: [Canvas Student Login](#). The [Canvas Student Guides Site](#) provides a variety of support available to students 24 hours per day. Additionally, a 24/7 Canvas Support Hotline is available for students to use: 877-893-9853.
- **Learning Services.** There are several learning labs on campus to assist students using computers and tutors. Please consult your [Campus Map](#) for the [Math Lab](#); [Reading, Writing & Language Labs](#); and the [Study Skills Center](#).
- **Library Services.** There is more to our library than just books. You have access to tutors in the [Study Skills Center](#), study rooms for small groups, and online access to a wealth of resources.
- **CANVAS LMS.** Canvas is Imperial Valley College's Learning Management System. To log onto Canvas, use this link: [Canvas Student Login](#). The [Canvas Student Guides Site](#) provides a variety of support available to students 24 hours per day. Additionally, a 24/7 Canvas Support Hotline is available for students to use: 877-893-9853.
- Any student with a documented disability who may need educational accommodations should notify the instructor or the [Disabled Student Programs and Services](#) (DSP&S) office as soon as possible. The DSP&S office is in Building 2100, telephone 760-355-6313. Please contact them if you feel you need to be evaluated for educational accommodations.

Financial Aid

Your Grades Matter! To continue to receive financial aid, you must meet the Satisfactory Academic Progress (SAP) requirement. Making SAP means that you are maintaining a 2.0 GPA, you have successfully completed 67% of your coursework, and you will graduate on time. If you do not maintain SAP, you may lose your financial aid. If you have questions, please contact financial aid at finaid@imperial.edu.

IVC Student Resources

IVC wants you to be successful in all aspects of your education. For help, resources, services, and an explanation of policies, visit <http://www.imperial.edu/studentresources> or click [the heart icon in Canvas](#).

Anticipated Class Schedule/Calendar

Subject to change without prior notice

WEEK OF	ACTIVITY, ASSIGNMENT, TOPIC	READING/VIDEOS	ASSIGNMENTS/EXAM DUE
Week 1 January 05-11	MODULE 0: Course Orientation	Please review the content in Module 0 on Canvas	

	<p>MODULE 1: Descriptive Statistics</p> <p>MODULE 2: Describing, Exploring, and Comparing Data</p> <p>MODULE 3: Probability</p>	Please read the content in Modules 1-2-3 and watch the accompanying videos	Modules 1, 2, 3 are due on 01/11/26
<p>Week 2</p> <p>January 12-18</p>	<p>MODULE 4: Discrete Probability Distributions</p> <p>MODULE 5: Normal Probability Distributions</p> <p>MODULE 6: Estimates and Sample Sizes</p> <p>Exam # 1</p> <p>(Modules 1-2-3)</p>	Please read the content in Modules 4-5-6 and watch the accompanying videos.	Modules 4, 5, and 6 along with Exam #1 - are due on 01/18/26.
<p>Week 3</p> <p>January 19-25</p> <p>Holiday:</p> <p>01/19/26</p>	<p><i>MODULE 7: Hypothesis Testing</i></p> <p>MODULE 8: Inferences from Two Samples</p> <p>MODULE 9: Correlation and Regression</p> <p>Exam # 2</p> <p>(Modules 4-5-6)</p>	Please read the content in Modules 7-8-9 and watch the accompanying videos.	Modules 7, 8, and 9 along with Exam #2 - are due on 01/25/26.
<p>Week 4</p> <p>January 26-February 01</p>	<p>MODULE 10: Goodness of Fit and Contingency Tables</p> <p>Module 11: Analysis of Variance</p> <p>Exam # 3</p> <p>(Modules 7-8-9)</p>	Please read the content in Modules 10-11 and watch the accompanying videos.	Modules 10 and 11 along with Exam #3 - are due on 02/01/26.
<p>Week 5</p> <p>February 02-04</p>	Final Exam (All Modules)	Please review all modules	Exam is due on 02/04/26
